*Authors Steve Gran and Brian Cain Share Their Work Excellence Method for Executives and Leaders*

A unified vision across an organization is more critical than ever. Yet, alignment remains a significant

challenge. In their new bestselling book, *Getting on the Same Page: Creating Excellence, Growth, and Performance Within Your Organization*, co-authors Steve Gran and Brian Cain offer a practical solution. Leveraging decades of expertise, they present the Work Excellence Method—a comprehensive framework designed to align leadership teams and drive sustainable performance across departments.

Drawing from real-world experience, Gran and Cain introduce readers to Rapid Manufacturing, a company that went from struggling with stagnation to achieving phenomenal growth, increasing its share price from \$30 to over \$200. Through case studies like this, *Getting on the Same Page* illustrates how any organization can benefit from a shared, purpose-driven approach that connects leadership, vision, and strategy.

“*Getting on the Same Page* explores the premise that achieving growth and excellence requires alignment, and alignment is best achieved through a common method. By adopting the Work Excellence Method, companies can streamline operations, reduce inefficiencies, and foster unity among team members,” says Jon Boumstein, CEO and Managing Partner of Cool Cat Technologies. “I will never run another company without Work Excellence!”

## A Common Method for Long-Term Success

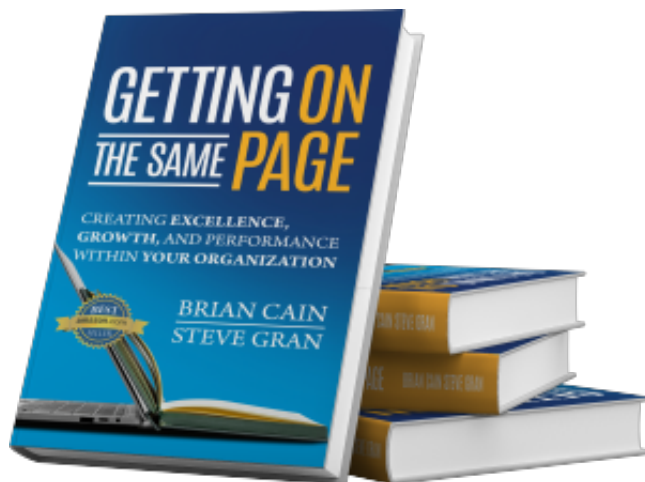

The Work Excellence Method is centered around four core elements: *Work Direction*, *Work System*, *Work Measurement*, and *Work Improvement*. Each element is designed to provide clarity, enhance communication, and encourage continuous growth. Throughout the book, readers will discover actionable steps to identify alignment gaps, increase organizational visibility, and enhance overall collaboration.

At the heart of the Work Excellence Method is the belief that when leaders and teams operate with a shared vision, remarkable transformations can occur. This approach has already impacted companies across various industries, enabling them to streamline processes, improve decision-making, and boost performance.

“A big thanks to Brian and Steve for tackling one of the biggest challenges for any organization—creating alignment. Their method provides a roadmap to achieve true collaboration and demonstrates how alignment drives not just profitability but cultural change,” adds Kenny Larson, CEO of Slumberland Furniture.
