

Blue Bear Self Storage Expands with Second Site in Bury St Edmunds - Now that's better!

Relief from clutter, complexity and compromise: that's the promise behind Blue Bear Self Storage, a company reimagining the way people think about storage with a commitment to continuous improvement, convenience and customer-first solutions.

Bury St Edmunds, Suffolk Dec 16, 2024 ([Issuewire.com](https://www.issuewire.com)) - Blue Bear is bringing its drive-up, hassle-free storage solutions to Barton Road, the firm's second site in Bury St Edmunds. The site opens on 10th January 2025 and is now taking reservations.

Blue Bear's expansion to Barton Road aligns with their plans to open two additional sites this year, as part of a commitment to bring enhanced self-storage options to more communities across the country.

What sets Blue Bear apart?

At Blue Bear, the philosophy is simple: every part of the self-storage experience can be made better. It's a commitment to marginal gains and continual progress: the focus is always on making each customer's experience smoother, faster and more convenient.

"We believe in providing more than just a storage unit," said co-founder James Jackson-Stops. "Our drive-up access means customers don't have to deal with long corridors or trolleys - they simply drive

up, unload, and go. It's about valuing people's time and keeping things straightforward."

With Blue Bear's "better" approach, it's all about refining the details that add up to a meaningful difference:

Better pricing: Save money with Blue Bear Self Storage! We offer unbeatable prices. Our modular drive-up units reduce cost, letting us pass the savings to you with market-leading prices. Save money today - reserve online or call now!

Better access: The drive-up units eliminate the usual hurdles, giving people fast, straightforward access to their belongings. Whether it's a house move or a business storing stock, they're in and out in minutes.

Better add-ons and protection: We go the extra mile, all units are Grafothermed to prevent damp. If you wish to store more valuable items, we can go further and offer fully-insulated units. If you want lights, we can offer them. Need electric sockets to power up your unit? No problem, we can do that too.

Better safety: Floodlit, gated facilities with 24-hour monitored security offer peace of mind with 6am-8pm access, so customers can visit whenever it suits them.

"We're in the business of better"

The Blue Bear philosophy goes beyond typical storage solutions. With options like flexible contracts, jargon-free terms and exclusive savings of up to 50% for the first eight weeks, they have designed storage packages to suit everyone's needs.

Plus, customers committing to a six or 12-month term enjoy additional savings of up to 20% on long-term storage.

"The power of better means never settling," Jackson-Stops said. "Every aspect of our service is built to evolve: providing customers not just with a storage space but with a storage experience they'll genuinely appreciate."

With the success of its first Bury St Edmunds site on Dettingen Way, Blue Bear has rapidly become a go-to solution for time-saving, affordable, and trustworthy self-storage.

A growing legacy of better self storage

The UK's highest-rated self-storage provider on Trustpilot, the company continues to build a loyal following among customers who value their approach to hassle-free, modern storage.

With seven operational drive-up sites across the UK, the company is gaining momentum as a trusted name that prioritises customer needs, quality service, and security.
