

Netdata Announces Integration with Buy with AWS, Offering Simplified Procurement for AWS Customers

Dover, Delaware Dec 7, 2024 ([Issuewire.com](https://www.issuewire.com)) - Netdata, a leading real-time observability platform, today announced its integration with Buy with AWS, a new feature now available through AWS Marketplace. By implementing Buy with AWS, Netdata now provides simplified software buying experiences for customers on its website, powered by AWS Marketplace, a digital store that makes it easy for customers to find, buy, deploy, and manage software and services from Amazon Web Services (AWS) Partners.

Buy with AWS allows customers to discover and purchase software available in AWS Marketplace from Netdata's website. By leveraging Buy with AWS, Netdata now offers its customers the flexibility to explore and procure software solutions using their Amazon Web Services (AWS) accounts from Netdata's website, streamlining the purchasing process and accelerating time-to-value. Post-purchase, customers can manage subscriptions in AWS Marketplace, take advantage of centralized AWS billing, and leverage cost optimization tools.

"As an AWS Marketplace seller, we are excited to offer Buy with AWS to enhance the customer experience on our website and serve more customers," said Costa Tsaousis, CEO and Founder at Netdata. "This new capability aligns with our commitment to delivering exceptional value to our customers by providing a seamless and efficient way to discover and acquire the software solutions they need."

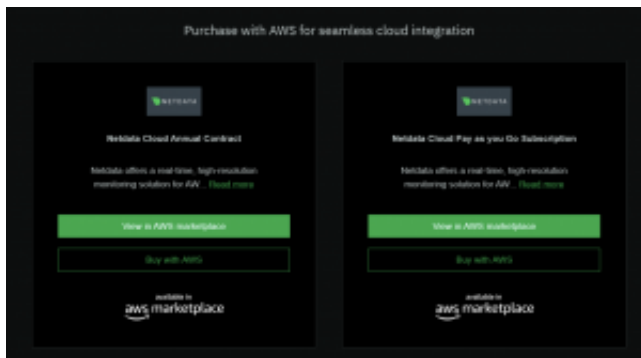

Netdata has successfully implemented Buy with AWS on its AWS Partner page. This new functionality allows customers to purchase Netdata's software directly using their AWS account details, providing a

convenient and trusted buying experience. The Buy with AWS feature streamlines the purchasing process and opens up significant opportunities for Netdata to enhance customer satisfaction and optimize sales processes.

Netdata's integration with Buy with AWS reinforces its commitment to providing innovative solutions and exceptional customer experiences. By leveraging the robust AWS Marketplace catalog and streamlining the procurement process, Netdata empowers its customers to make informed decisions and accelerate their digital transformation journeys.

Customers visiting www.netdata.cloud can see products that are available for purchase in AWS Marketplace. Learn more about Buy with AWS by visiting the [Buy with AWS webpage](#).

About Netdata – Netdata is a high-performance observability platform designed to monitor IT infrastructure in real-time, with unparalleled efficiency. Netdata is a fully distributed solution with data (metrics and logs) always remaining on-premises, requiring zero-configuration to get started, offering a powerful and comprehensive monitoring experience, out of the box.
