

# Securify Strengthens Cloud Security with Comprehensive Assessment Services

Securify's cloud application security assessment services help organizations identify vulnerabilities and mitigate risks across multiple cloud platforms, ensuring robust and reliable security measures.

**New York City, New York Dec 31, 2024 ([Issuewire.com](https://www.issuewire.com))** - In today's world, ensuring cloud security is a crucial issue, especially with the ongoing integration of cloud solutions by a multitude of businesses. In this regard, as cloud computing becomes more common for companies, there becomes a growing need for security measures (technologies, policies and procedures in place) to protect sensitive data, applications and other cloud infrastructures. To meet this emerging demand, Securify has introduced its wide-ranging **[Cloud Application Security Assessment service](#)**, which is intended to help organizations that operate on cloud frameworks across the globe strengthen their security posture.

The Cloud Application Security Assessment service of Securify seeks to identify weaknesses, determine related risks, and provide actionable insights that ensure a more powerful infrastructure for organizations operating in the cloud. This service is part of Securify's initiatives aimed mostly at enabling businesses to operate successfully within the complex cloud security context against constantly evolving security threats.

"With regard to the issue of managing cloud platforms, it is clear that many organizations face critical challenges," Securify's representative said. "Our goal is to help organizations identify vulnerabilities, fix compliance gaps and develop the necessary security to protect their critical assets."

Security provides **[free Cloud Application Security Assessment service](#)** to aid companies in determining the robustness of their security regime relative to globally accepted standards such as OWASP Top 10

and CIS Benchmarks. By simply filling out a basic form, organizations will obtain a thorough report accompanied by detailed and practical recommendations, and all of this at no cost.

Securify takes a versatile approach when it comes to deploying security assessment services across multi-cloud platforms. They focus on building a custom multi-cloud strategy for their clients so that they do not have to compromise on security or worry about sticking with one vendor. Moreover, Securify prioritizes the security aspect of cloud facilities by providing constant support and practical advice so that the enterprise is able to comply with the continuously evolving regulatory requirements.

### **About Securify**

Securify is a leading provider of cloud security solutions, specializing in helping organizations protect their cloud infrastructures through comprehensive, customized security services. With a team of experienced professionals and a multi-cloud proficiency, Securify offers end-to-end security solutions that address vulnerabilities, compliance gaps, and security risks across major cloud platforms.
