

Alba Dental Centre Revolutionizes Orthodontic Treatment with Fastbraces Technology

London, Ontario Jan 31, 2025 ([IssueWire.com](https://www.issuewire.com)) - Alba Dental Centre, a leading dental clinic in London, Ontario, is proud to introduce Fastbraces®, a groundbreaking orthodontic solution that combines innovation with efficiency. This revolutionary treatment significantly reduces the time needed to achieve a straighter, healthier smile, providing a modern alternative to traditional braces.

Fastbraces technology offers a faster, more comfortable, and cost-effective way to address orthodontic issues like misaligned teeth, overbites, and crowding. By initiating root movement at the start of treatment, Fastbraces enables patients to see results in less than a year, with some cases completed in as few as three months.

Benefits of Fastbraces at Alba Dental Centre

Patients choosing Fastbraces at Alba Dental Centre can expect a host of advantages, including:

- **Shorter Treatment Timeline:** Achieve a straighter smile in months rather than years, compared to traditional braces.
- **Greater Comfort:** The unique triangular bracket design reduces pain and discomfort associated with orthodontic adjustments.
- **Preservation of Natural Bite:** Fastbraces minimize the need for extractions, ensuring a more natural and comfortable outcome.
- **Reduced Costs:** With faster results and minimized treatment time, Fastbraces often cost less than traditional braces.
- **Minimal Retainer Use:** Unlike standard braces requiring long hours of retainer wear, Fastbraces patients only need 15 minutes a day to retain progress.

Dr. Nuha Baalbaki, a Senior Master Provider of Fastbraces at Alba Dental Centre, specializes in creating personalized orthodontic solutions to suit each patient's needs. This innovative option is perfect for adults and children seeking effective results without the lengthy commitment of traditional braces.

Comprehensive Dental Services Tailored for Every Smile

At Alba Dental Centre, patients can access a full spectrum of dental care services designed for individual and family needs. Grouped under relevant categories, these services ensure robust oral health solutions:

Preventive Care

- **Teeth Cleaning:** Regular cleaning to remove plaque and maintain oral hygiene.
- **Family Dentistry:** Ongoing dental care for patients of all ages.
- **Periodontal Care:** Management of gum disease to prevent tooth loss.

Restorative Dentistry

- **Dental Implants:** Durable, natural-looking replacements for missing teeth.
- **All-on-X Implants:** Implant-supported full-arch restorations for complete smiles.
- **Crowns and Bridges:** Repairs and replacements to restore tooth function and appearance.
- **Dentures:** Removable solutions for missing teeth.
- **Root Canals:** Treatment to save infected or damaged teeth.
- **Bone Grafts:** Procedures to support dental implants.

Cosmetic Dentistry

- **Smile Makeovers:** Transformative plans for a beautiful, personalized smile.
- **Veneers:** Custom-crafted shells to improve the appearance of teeth.
- **Teeth Whitening:** Professional treatments for a brighter, radiant smile.
- **Gummy Smile Correction:** Treatments to balance excessive gum exposure.

Orthodontics

- **Fastbraces:** Revolutionary braces that offer quicker, more comfortable results.
- **Invisalign:** Virtually invisible aligners for a straighter smile.

Specialty Services

- **TMJ Treatment:** Alleviating discomfort from jaw joint disorders.
- **Oral Surgery:** Surgical solutions for complex dental conditions.
- **Sleep Apnea and Snoring Solutions:** Diagnosis and treatment of sleep-related issues.
- **Tongue Tie Treatment:** Procedures to improve oral mobility and functionality.
- **Laser Dentistry:** Efficient, less-invasive treatment for various dental needs.

Emergency Care

- **Urgent Treatments:** Quick and reliable solutions for unexpected dental issues, providing immediate relief and peace of mind.

Alba Dental Centre's offerings are designed to meet any dental needs with precision and care. Their welcoming atmosphere, combined with state-of-the-art technology like laser dentistry and the iTero scanner, ensures a seamless dental experience for every patient.
