

Bengaluru Techie Darshan Leaves MNC Job to Build Cutting-Edge Startup Cinuse

From corporate comfort to entrepreneurial challenges, Darshan's journey with Cinuse reflects innovation, resilience, and growth in design and automation.

Almora, Uttarakhand Mar 3, 2025 ([IssueWire.com](https://www.issuewire.com)) - Darshan Singh Karki, co-founder and CTO of Cinuse Engineering Services LLP has shared his inspiring entrepreneurial journey, garnering attention across social media platforms. After dedicating over five years to the corporate world and leaving his dream job at an MNC in 2024, Darshan embarked on a mission to revolutionize design and automation through his startup, Cinuse.

Reflecting on his bold leap, Darshan wrote in a now-viral LinkedIn post: "2024 has been a good year for me. Leaving my high-paying corporate job wasn't just about ambition; it was about fulfilling my urge to create something meaningful and impactful. Starting up isn't easy, but the journey is worth it."

Cinuse initially focused on design automation, capitalizing on Darshan's extensive expertise in RAN, 5G, and small-cell design. Today, the company is expanding its footprint into collaborative intelligence and AI-driven solutions.

Darshan's journey hasn't been without challenges. Registering Cinuse as a Limited Liability Partnership in 2024 marked a significant milestone, alongside navigating the complexities of building a client base and establishing the company as a trusted brand in the engineering space. His past achievements, including the successful use of Solargraf automation tools to streamline processes and mentoring in design automation, have been instrumental in shaping Cinuse's trajectory.

Cinuse now aims to collaborate with government entities, fostering growth in India's engineering and design landscape while staying true to its mission of delivering innovative, future-ready solutions.

This journey of resilience, innovation, and growth continues to inspire aspiring entrepreneurs, shedding light on the rewards of pursuing one's vision despite the risks.
