

Dr. Sunny Khanna Inaugurates Advanced HIPEC Surgery Facility with Leading Surgical Oncologist

Dr Sunny Khanna is the best surgical oncologist in Kolkata. He is an eminent cancer surgeon.

kolkata, West bengal Jan 21, 2025 ([Issuewire.com](https://www.issuewire.com)) - Renowned medical professional Dr. Sunny Khanna is proud to announce the inauguration of a state-of-the-art HIPEC (Hyperthermic Intraperitoneal Chemotherapy) surgery unit, in collaboration with a distinguished surgical oncologist. This cutting-edge facility is set to provide innovative cancer treatment options, enhancing patient care and improving outcomes for those battling abdominal cancers.

Introducing HIPEC: A Revolutionary Cancer Treatment

HIPEC is a specialized procedure that combines surgery with heated chemotherapy. This approach is particularly effective for patients with advanced cancers of the abdominal cavity, such as peritoneal carcinomatosis. By delivering heated chemotherapy directly into the abdominal cavity after surgical tumor removal, HIPEC targets residual cancer cells, reducing the risk of recurrence and improving survival rates.

Dr. Sunny Khanna: Pioneering Advanced Cancer Treatments

Dr. Sunny Khanna has always been at the forefront of medical advancements, with a strong commitment to adopting the latest techniques to improve patient outcomes. His expertise in complex surgical procedures and dedication to patient care have earned him a stellar reputation in the medical community.

"This new HIPEC technology represents a significant milestone in our mission to offer comprehensive cancer care treatment," said Dr. Khanna. "By integrating this advanced technology, we aim to provide our patients with the best possible outcomes, giving them a fighting chance against aggressive cancers."

Collaboration with a Leading Surgical Oncologist

The inauguration of the HIPEC unit is a result of a fruitful partnership between Dr. Khanna and a leading surgical oncologist, whose expertise in oncology and dedication to innovative treatments are well recognized. Together, they form a formidable team, bringing hope to many patients through personalized and effective cancer care.

"We are excited to bring this advanced treatment to our community," the surgical oncologist added. "HIPEC has shown promising results, and we are confident that our combined expertise will make a significant difference in the lives of our patients."

Benefits of HIPEC Surgery

- **Targeted Treatment:** HIPEC allows for direct application of chemotherapy to cancer cells in the abdominal cavity, minimizing systemic side effects.
- **Enhanced Efficacy:** The heated chemotherapy is more effective in destroying cancer cells and may prevent the growth of new tumors.
- **Improved Survival Rates:** Patients undergoing HIPEC have shown improved survival rates compared to those receiving traditional chemotherapy alone.
- **Reduced Recurrence:** By targeting microscopic cancer cells post-surgery, HIPEC reduces the likelihood of cancer recurrence.

State-of-the-Art Facility

The new HIPEC unit is equipped with the latest technology, ensuring precision and safety during the procedure. The facility also features a dedicated team of trained medical professionals, including nurses, anesthesiologists, and support staff, all committed to providing the highest standard of care.

Commitment to Patient-Centric Care

Dr. Khanna and his team emphasize a patient-centric approach, ensuring that each individual receives personalized care tailored to their specific needs. From initial consultation to post-operative follow-up, patients will experience comprehensive support throughout their cancer journey.

Looking Ahead

The inauguration of the HIPEC surgery unit marks a new chapter in cancer treatment in the region. Dr. Khanna and his team are optimistic about the potential of this advanced procedure to change lives, offering hope and healing to many.
