

Global Health Partners Alliance Inc. (GHP) launches its first HealthNOW Specialty Care Clinic

HealthNOW

Toronto, Ontario Jan 5, 2026 ([IssueWire.com](https://www.issuewire.com)) - Global Health Partners Alliance Inc. (GHP) launches its first HealthNOW Specialty Care Clinic focused on treating Concussion Patients and Chronic Pain Conditions through a physician led team complemented with a full suite of Rehabilitation and other allied healthcare services giving patients in Ontario quick access to speciality care.

🔗 Innovative **HealthNOW** Specialty Care Clinic opens in Ontario, offering comprehensive patient care solutions

🔗 New clinic reduces wait times from months or weeks to days for concussion, chronic pain, and mobility issues

🔗 Evidence-based program developed by emergency physicians and patients

🔗 First phase of planned provincial and national expansion of specialized healthcare services

Global Health Partners Alliance Inc. (GHP) launches its first **HealthNOW** Specialty Care Clinic focused on treating Concussion Patients and Chronic Pain Conditions through a physician led team complemented with a full suite of Rehabilitation and other allied healthcare services giving patients in Ontario quick access to speciality care.

Michael Di Cesare, CEO and Chairman of GHP, commented: “Today we achieved a special milestone, and it's a very significant day for me personally as well as our future patients. Having been in the healthcare industry for over 15 years, supporting Canadians' access to care, I'm proud to announce that through the hard work and commitment of our partners, team members, and allied health network in Ontario, we've launched our specialty healthcare clinic focused on treating patients with concussion, chronic pain, and mobility issues.

The **HealthNOW** clinic gives emergency doctors, specialists, and GPs options for supporting their patients, and most importantly, gives patients quick access instead of waiting weeks or even months to see a medical professional. Leveraging our extensive network, **HealthNOW** ensures that patients can receive care close to home or virtually, facilitating seamless follow-up from emergency department discharge through to full recovery.

Dr. Ian Preyra, Vice President and Medical Director of Global Health Partners commented:

"With a primary focus on concussion management, this innovative clinic enables emergency and primary care physicians to swiftly and reliably refer patients who have experienced mild traumatic brain injuries for follow-up with a concussion specialist physician within days of diagnosis or discharge. Importantly, there is no cost to the patient for this service. This program, developed by emergency physicians and concussion patients, is firmly grounded in best practices for concussion care. It represents a significant step forward in providing timely, accessible, and high-quality care for those affected by concussions."

HealthNOW's multidisciplinary team works collaboratively to deliver personalized, evidence-based care that addresses the diverse needs of our patients. By integrating expertise from various medical specialties, we offer a holistic approach to treatment and recovery. "We look forward to providing concussion patients across the province with equitable and rapid access to healthcare", said **David Richards, President and COO**. "Our virtual clinic option provides a lifeline to patients who would otherwise struggle, either geographically or medically, to attend an in-person visit, and our expansive healthcare network provides them with a clear pathway to aid in their recovery."

About Global Health Partners Alliance Inc.

Global Health Partners Alliance Inc. (GHP) is a Canadian healthcare company dedicated to building "**The Bridge to Better Healthcare**" through innovative, comprehensive, and patient-centered solutions. GHP's mission is to revolutionize healthcare delivery by enhancing accessibility, affordability, and effectiveness across multiple specialized divisions.
