

## is-cod.in Revolutionizes Subdomain Management with User-Controlled DNS Panel

In a groundbreaking move to simplify digital infrastructure, 18-year-old tech entrepreneur Mohammed Araan Sheikh, have launched is-cod.in, the world's first-ever Subdomain DNS Management Panel.

Bengaluru, Karnataka Jan 17, 2026 ([Issuewire.com](https://www.Issuewire.com)) - is-cod.in, created by tech entrepreneur Mohammed Araan Sheikh and managed by TUMULL I.N.C., introduces the world's first **Subdomain DNS Management Panel**, a transformative tool designed to give users full autonomy over their

subdomains and DNS configurations. This innovation simplifies digital infrastructure, allowing users to claim, manage, and update subdomains effortlessly.

With support for three domains—**is-cod.in**, **is-host.in**, and **topg.dad**—the platform enables users to claim custom subdomains like **username.is-cod.in** and take charge of DNS records such as A, CNAME, and TXT entries. The process is seamless, ensuring real-time updates without the need for intermediaries.

## A Vision Realized by Mohammed Araan Sheikh

At just 18 years old, **Mohammed Araan Sheikh**, has already made significant strides in the tech world. Known for pioneering platforms like **Aracale** (music streaming) and **XybRix** (developer tools), Araan envisioned **is-cod.in** as a way to democratize subdomain management.

**“With is-cod.in, users have the power to manage their subdomains without relying on external providers. It’s fast, intuitive, and built for the modern web.”**

## Key Features

- **Custom Subdomains:** Claim personalized subdomains under **is-cod.in**, **is-host.in**, and **topg.dad**.
- **User-Controlled DNS:** Manage DNS records like A, CNAME, TXT, and more with ease.
- **Real-Time Updates:** Instantly apply DNS changes for uninterrupted functionality.
- **Developer-Friendly:** Ideal for hosting projects, testing, and building online portfolios.
- **Free to Use:** A cost-effective solution for startups, developers, and individuals.

## Innovation by TUMULL I.N.C.

**TUMULL I.N.C.**, led by Araan, is renowned for its innovative solutions in technology and digital transformation. Alongside **is-cod.in**, the company’s portfolio includes projects like **TARDZ** (automotive research), **Aracale** (Music streaming platform), and **XybRix** (developer utilities), each designed to push the boundaries of what’s possible.

## Explore All Services by TUMULL I.N.C.

In addition to **is-cod.in**, TUMULL I.N.C. offers a wide range of services tailored to meet the needs of developers, businesses, and end users:

- [Aracale](#) - AI-powered music streaming platform offering artist collaboration and audio distribution.
- [XybRix](#) - A suite of developer tools, including website status checks, SSL validation, and API integrations.
- **is-host.in** - Free subdomain hosting with cloud hosting, SSL certificates, and DNS management.
- [Register](#) - A subdomain management platform providing domain search, easy registration, and DNS services.
