New Delhi, Delhi Jan 15, 2025 ([Issuewire.com](https://www.issuewire.com)) - **KardoAI**, the cutting-edge fintech startup dedicated to maximizing credit card rewards, is thrilled to announce its official launch in India. With this expansion, KardoAI brings its revolutionary app to one of the fastest-growing credit card markets, empowering Indian consumers to make smarter financial decisions and get the most out of their credit cards.

Now available for download on **iOS** and **Android**, KardoAI offers Indian users personalized recommendations, rewards tracking, and enhanced financial insights—all designed to optimize their credit card usage and benefits.

Transforming the Indian Credit Card Experience

With over 80 million credit card users in India, many cardholders struggle to fully utilize their rewards and benefits. KardoAI's AI-powered platform simplifies this process by recommending the best card for any purchase—whether it's dining, shopping, travel, or groceries—based on a user's unique spending habits and card rewards.

"In India, credit cards are a growing financial tool, yet many cardholders leave significant value on the table by not leveraging their rewards efficiently. KardoAI aims to bridge this gap," said Dan Poh, Founder and CEO of KardoAI. "Our mission is to empower users to make every swipe count, helping them save more, earn more, and unlock a smarter way to manage their finances."

Key Features for Indian Users:

Personalized Card Recommendations: Tailored insights on which credit card to use for maximum rewards at any merchant or online store.

Localized Merchant Search: Integrated with Google Maps to help users find nearby merchants and see where they can earn the most rewards.

Comprehensive Rewards Tracking: A centralized dashboard for monitoring and managing cashback, points, and miles across multiple cards.

Flight and Hotel Redemptions: Plan trips effortlessly by redeeming points directly through the app.

Strengthened by Global Partnerships

KardoAI's Indian launch is backed by strong partnerships with industry leaders such as Plaid, Mastercard, and OpenAI. These collaborations ensure a seamless experience for users by leveraging world-class technologies and infrastructure tailored to the Indian market.

As part of its commitment to innovation, KardoAI is also a member of the Google for Startups Campus and the NVIDIA Inception Program, which have played a pivotal role in shaping the company's AI-driven platform.

Looking Ahead

India marks the first of four new countries KardoAI will expand into in 2025. The company is set to unveil exciting new features this year, including a web browser interface for enhanced accessibility and an app revamp focused on smarter, bias-free AI recommendations.
