New Delhi, Delhi Dec 28, 2025 (Issuewire.com) - Did you know that the **Vastu shastra for home** can significantly improve the energy at your place? Use these Vastu principles to create a properly designed dwelling room that attracts prosperity, health, and happiness. Let's check out some [interior design ideas for the living room](#), kitchen area, and other places of your house to make it perfect as per the Vastu Shastra.

Entrance

The main door usually opens into the living room and forms the gateway, which can convey negative and positive energies. The most beneficial positions of the entrance door are north, east, and northeast. The entrance has to be nicely illuminated with an attractive nameplate and a floral toran. Plus, avoid putting a shoe rack close to the door.

Direction

In keeping with **Vastu's tips for the kitchen**, living room, and other spaces, then it should face north, east, northeast, or northwest. If the dining location is connected to the living room, it has to be placed to the east or southeast of the residing room and should be towards the kitchen. In an open-plan design home, the puja room should be positioned northeast of the living room.

Furniture Layout

Adding to the list of living room Vastu recommendations is the format of the fixture. Choose rectangular or square portions of furnishings and keep away from rounded or unusual shapes. Wooden furniture emits higher power vibrations than artificial substances. All the heavy pieces of furniture, just like the couch units and couches, should be positioned inside the west or southwest course of the residing room. The sofa can be arranged in opposition to the north or the east wall. Install the TV unit on the southeast side of the residing room. To get the best **interior design ideas for the living room**, it is essential to choose the right interior designer for your home.

Color Scheme

According to [Vastu Shastra for home](#), colors entice unique varieties of energy. Avoid using darkish colorations and choose neutrals like white, cream, and beige as an alternative. You also can bear in mind colorations like blue, inexperienced, or warm yellow for the residing room. Add richness and intensify the decor of the living room by introducing throw cushions and add-ons in wealthy shades of turquoise, purple, or gold. Avoid using colors such as black and dark red, as these colors may tend to absorb negative energies.

Living Room Decor

Make sure that the residing room is continually clean and clutter-free. Remove unnecessary pieces of fixtures and non-important objects from the living room. Create a properly designed residing room that reflects your flavor and lifestyle, and make sure that the decor evokes satisfied and non-violent emotions. Never decorate the living room with art portions or add-ons that depict sorrow or disappointment.

Furthermore, objects like broken showpieces, electrical appliances that don't paint, broken mirrors, cracked glass, and so forth should be removed because they tend to attract negative energy and bad luck.

Incorporate paintings that present the beauty of nature and keep away from the use of dried flowers, a bonsai, or cactus within the dwelling room. Note that real flowers attract positive energy at the same time as dried flora appeal to negative energy. Decorate your residing room with air-purifying plants like money plants, spider plants, areca hands, snake flora, and peace lilies.

Additional Tips:

- **Lighting:**

When it comes to lighting, make sure your living room and kitchen have enough space for natural light during the daytime and use only soft, warm lighting for the evening. This will help you create a calm and welcoming atmosphere while promoting positivity. Furthermore, according to **Vastu Shastra, for home**, you should position lighting fixtures such as lamps in the southeast for optimal results.

- **Mirrors:**

Always keep in mind that mirrors should be placed on the north or east walls of the living room. As they reflect positive energy and help expand the room's space visually. However, you should always avoid placing mirrors in the other directions.

- **Ceiling Design:**

The ceiling is one of the most essential parts of the room. Therefore, you should not add sharp edges or beams as they look weird, create tension, and attract negative energy. Consequently, you must opt for a flat ceiling design. Do opt for a smooth, even ceiling to maintain a balance in the room.

Conclusion

Incorporating **Vastu Shastra for home** can lead to positive energy, prosperity, and overall well-being. Therefore, thoughtful arrangement of furniture, color choices, and decor items can enhance the flow of energy in your home. If you're seeking to transform your place with professional expertise, then you can connect with [Ray's Furniture & Interiors](#).
