Paris, France Jan 8, 2025 ([Issuewire.com](https://www.issuewire.com)) - [Scientific IQ](#) cordially invites you to the “[Global Conference on Surgery and Anaesthesia](#)” Scheduled as a Hybrid Event from June 23-24, 2025, participants can attend in person in Paris, France, or virtually from anywhere. Experience a unique mix of in-person and online events, bringing together global surgery and anesthesia experts for rich talks and learning. Mark your calendar to join this groundbreaking meeting shaping healthcare’s future. The main theme of this worldwide gathering will be “A Global Discussion on Surgery Research and Techniques”. Surgery keeps changing, with new research and tech making operations safer, better, and quicker to recover from people and machines now work together more than ever, using AI, surgery robots, 3D printing, and new ways to see inside the body for many treatments. The future of surgery looks even brighter beyond these new tools.

Our yearly [global meeting on surgery and anesthesia](#) brings together surgeons, health workers, anesthesia doctors, researchers, scientists, teachers/Professors, nurses, trainees, rule-makers, industry folks, and advisors. This three-day event gives doctors and scientists who work in the complex world of anesthesia and surgery a place to share ideas. Covering the newest topics in these areas, the meeting looks at new patient treatment methods. People who come can be part of one of the biggest worldwide events in surgery and anesthesia. They can meet other pros, scientists, teachers, and students, find new chances, and learn more. The event lets researchers talk to each other, sharing what they’ve learned about all parts of the [Anesthesia Conference](#) and [Surgery Conference](#). The 2025 conferences on Surgery and Anesthesia are guaranteed to be instructive, with a purposeful universal collaboration and cutting-edge improvements. Attending these meetings offers professionals and newcomers a great opportunity to be updated with the most recent developments in surgical and anesthetic practices.
