

Acharya Pandit Dheerendra Tripathi: A New Approach to Astrology and Technology

Suthaliya, Madhya Pradesh Apr 22, 2025 ([Issuewire.com](https://www.issuewire.com)) - [Acharya Pandit Dheerendra Tripathi](#), a scholar in Indian astrology and astronomical mathematics, is currently in the spotlight for his research and technological experiments. He is working on developing new software and algorithms based on the ancient text Surya Siddhanta to make astrological calculations more scientific and accurate.

Research in Astrology and Mathematical Studies

Acharya Dheerendra Tripathi has a deep interest in astronomical mathematics and Panchang (Hindu calendar) calculations. He believes that ancient Indian astronomical scriptures contain many principles that, if properly applied, can enhance the precision and reliability of modern astrology. His work involves comparing various Panchangs and astrological systems to analyze their mathematical differences and inconsistencies.

Technological Integration and Digital Innovations

To make astrological consultations more accessible through digital platforms, he is developing a Flutter-based mobile application that will facilitate direct communication between astrologers and clients. Additionally, he is working with IVR systems and SIP Trunk technology to streamline astrological services.

He is also engaged in developing a call management system that enables Caller ID Masking using Mobile SIMs, ensuring privacy during astrological consultations. This technology aims to improve the security and confidentiality of client interactions.

Education and Research Initiatives

Besides research, Acharya Tripathi is actively involved in astrological education. He conducts a one-year predictive astrology course to teach students both traditional and modern astrological calculations. Additionally, starting from April 15, he will be offering an online course on Sanskrit grammar and Ashtadhyayi to promote classical linguistic studies.

Social Initiatives and the “Dusht Sanhār Abhiyan”

Recently, he launched the Dusht Sanhār Abhiyan, a campaign aimed at raising awareness against online fraud and fake companies. Through this initiative, he is identifying individuals and organizations involved in fraudulent activities and educating people on how to avoid scams.

Yagya Ashram and Vedic Studies

Acharya Tripathi is also associated with Yagya Ashram, an institution dedicated to the study and promotion of Vedic sciences, astrology, Sanskrit, and religious rituals. The ashram organizes various classes and discussion sessions on these subjects.

Future Plans

In the coming months, he plans to develop an independent AI system capable of automating astrological calculations and analyzing planetary positions based on horoscopes. This project aims to create a self-reliant astrology-based AI without depending on external AI services.

Conclusion

Acharya Pandit Dheerendra Tripathi is focusing on integrating astrology with modern technology. His dedication to improving astrological accuracy, adopting technological innovations, and engaging in social initiatives has garnered attention from various institutions and scholars.
