

Andrew Sloan, MD, FACS: A Leader in Neurosurgery and Brain Tumor Immunotherapy

Pioneering Innovative Treatments for Brain Tumors at Piedmont Healthcare in Atlanta

New York City, New York Feb 14, 2025 ([Issuewire.com](https://www.issuewire.com)) - Dr. Andrew Sloan, a nationally and internationally renowned neurosurgeon, and physician-scientist, continues to lead the way in the field of neurosurgery and immunotherapy for brain tumors. With over three decades of dedication to neuroscience and cancer biology, Dr. Sloan has established himself as a key figure in advancing treatments that aim to make a significant difference in patients' lives.

Currently serving as the Chief of Neurosciences at Piedmont Healthcare in Atlanta, Georgia, Dr. Sloan specializes in a range of critical areas including benign and malignant brain tumors, gliomas, minimally invasive techniques, and tumor vaccines. His impressive surgical schedule, which includes over 300 brain surgeries annually, reflects his commitment to patient care and innovative treatment strategies.

Dr. Sloan's academic credentials are equally impressive; he is an Adjunct Professor of Neurological Surgery and Pathology at the Case Comprehensive Cancer Center and the Case Western Reserve University School of Medicine. His previous roles include serving as the Peter D. Cristal Chair in Neurosurgery and Vice Chairman of the Department of Neurosurgery at Case Western Reserve University, where he also directed the Brain Tumor and Neuro-Oncology Center.

Throughout his career, Dr. Sloan has held numerous leadership positions, contributing to both local and national committees. He is currently the Chair of the Neuroscience Clinical Guidance Council at Piedmont Health and the Neuroscience Chair of the Piedmont Research Institute. His involvement in education is significant; he has led advanced neurosurgical training courses for practicing neurosurgeons and trainees at major national organizations including the American Association of Neurological Surgery (AANS) and the Congress of Neurosurgery (CNS).

Dr. Sloan's passion for medicine began at an early age, culminating in a Bachelor of Science degree from Yale University and an MD from Harvard Medical School. His extensive training included an internship in general surgery and a residency in neurosurgery, as well as a fellowship at the prestigious MD Anderson Cancer Center in Houston, Texas. Most recently, in 2020, he earned an MBA with a healthcare specialization from Baldwin Wallace University.

In addition to his clinical and academic achievements, Dr. Sloan is an active member of various professional organizations, including the American Association of Neurological Surgeons and the Society of Neuro-Oncology. His leadership extends to the FDA Committee for Drugs and Devices, where he has played a role in shaping policies that impact patient care.

Dr. Sloan's contributions to the field are further amplified by his editorial work; he serves as an Associate Editor for Operative Neurosurgery and is involved with several other major neurosurgical and scientific journals. With over 240 peer-reviewed publications, six US patents, and more than 650 invited presentations, Dr. Sloan's work has garnered both national and international recognition.

Recognized for his excellence, Dr. Sloan has been named one of the "Best Doctors in America" since 2003, a Castle-Connolly Top Doctor since 2004, and cited as one of the "Top Surgeons in America" since 2007. His expertise is frequently sought after in media appearances, where he shares insights on brain cancer and innovative treatment options.

As Dr. Sloan continues his groundbreaking work in neurosurgery and immunotherapy, both patients and the medical community can look forward to further advancements that promise to enhance the quality of life for those affected by brain tumors.
