

Augustine Changdae Lee, MD, Enhances Patient Care and Research at Dean Stroud Spine and Pain Institute

Leading Physiatrist and Researcher Brings Expertise in Interventional Spine and Musculoskeletal Medicine

New York City, New York Feb 20, 2025 ([Issuewire.com](https://www.issuewire.com)) - The Dean Stroud Spine and Pain Institute is proud to highlight the contributions of Dr. Lee, a dedicated physiatrist and clinical researcher whose work at the Institute continues to transform the landscape of pain management and rehabilitation. Dr. Lee serves as a staff physiatrist and is also an adjunct faculty member at the Department of Physical Medicine and Rehabilitation (PM&R) at Emory University School of Medicine, bringing a wealth of expertise in interventional spine and musculoskeletal medicine.

Dr. Lee's academic journey culminated in a residency in PM&R at Tufts Medical Center, where he honed his skills in managing complex pain conditions. His pursuit of excellence led him to a prestigious fellowship in Interventional Spine and Musculoskeletal Medicine at Vanderbilt University Medical

Center, recognized by the North American Spine Society. This specialized training equips him with advanced techniques in non-operative fluoroscopic interventional procedures designed to alleviate debilitating spinal pathologies.

In addition to his clinical prowess, Dr. Lee boasts an impressive research background. He completed a postdoctoral research fellowship focused on clinical trials and epidemiological analyses for chronic pain treatment. His dedication to advancing the field is reflected in his extensive portfolio of over 50 peer-reviewed research publications. Dr. Lee's research interests center on understanding the variability in treatment responses among patients, exploring innovative therapeutic options, and refining treatment paradigms for adults experiencing persistent pain conditions.

At the Shepherd Center, Dr. Lee plays a multifaceted role, seamlessly integrating impactful research, clinical care, and interventional procedures. His innovative approach to pain management aligns with the center's mission to improve the quality of life for individuals facing the complexities of spinal and pain disorders. By bridging the gap between research and clinical practice, Dr. Lee strives to enhance patient outcomes and contribute to the evolution of treatment methodologies in the field.
