

# CertifyMe and Matrix Intelligence Unveil EduTranscript to Advance Transcript Management for North American Universities

**Philadelphia, Pennsylvania Feb 26, 2025 ([Issuewire.com](https://www.issuewire.com))** - CertifyMe, a leader in secure digital credentialing, is teaming up with Matrix Intelligence, a top technology solutions provider. Together, they're launching EduTranscript, a modern, secure way for universities in North America to manage transcripts and academic records. This partnership is all about security, efficiency, and trust.

For years, universities have struggled with outdated transcript systems. Processing requests takes too long. Fraud and document tampering are constant concerns. EduTranscript solves these problems by offering a secure, verifiable, and fraud-resistant system for managing student records.

## Shared Mission for Higher Education

Both companies see the same challenge: the need for a more secure, digital-first approach to academic records. Universities need a system that keeps documents safe while making it easier for students, employers, and institutions to verify transcripts instantly.

By combining CertifyMe's expertise in digital credentialing with Matrix Intelligence's technology and data security capabilities, EduTranscript brings a much-needed modern solution to higher education.

"Universities need a better way to manage student transcripts," said Chickoo Chawda, Co-Founder of Matrix Intelligence. "Our collaboration with CertifyMe creates a reliable, secure, and efficient system that

benefits students and institutions alike.” This innovation is more than just software—it’s a step forward for academic integrity. Schools can streamline transcript processing, students can securely access their records, and employers can instantly verify qualifications without jumping through hoops.“

Our goal at CertifyMe has always been to provide individuals with trusted, verifiable digital credentials,” said Ranjith Tharayil, CEO of CertifyMe. “Working with Matrix Intelligence allows us to take this even further. EduTranscript will set a new standard for transcript security and ease of use.”
