

Empowering Traders Worldwide: SpeedBot.tech Sets New Standards in Algorithmic Trading

SpeedBot is transforming algo trading with cutting-edge AI technology, offering no-code strategy builders, backtesting tools, and seamless TradingView integration to help traders worldwide automate, optimize & thrive in competitive financial market.

Ahmedabad, Gujarat Feb 19, 2025 (Issuewire.com) - We are thrilled to announce a significant milestone for SpeedBot.tech as we expand our footprint in the U.S. market. As a team with deep roots in the algorithmic trading landscape, we have been serving clients globally with excellence in prop trading, options trading, forex trading, and cutting-edge crypto bot development for years.

Our entry into the U.S. trading market marks the beginning of an exciting new chapter. SpeedBot has consistently been at the forefront of delivering state-of-the-art trading automations solutions, empowering traders to thrive in competitive markets.

This expansion is a testament to our unwavering commitment to innovation and client success. We are proud to bring our expertise and services to an even broader audience, solidifying our position as a global leader in algorithmic trading.

Supporting Trading Community with Specialized Algo Trading Software

The world of algorithmic trading is undergoing rapid transformation, fueled by regulatory changes from leading stock markets around the world aimed at fostering transparency and innovation. SpeedBot.tech's algo trading software has emerged as a trusted partner for traders, offering cutting-edge solutions that enhance trading efficiency and profitability. By addressing the unique requirements of both retail and institutional traders, SpeedBot is enabling users to navigate complex markets with greater confidence and precision.

"With SpeedBot expanding its footprint in the USA, we are thrilled to support traders in automating their trades with cutting-edge technology. Our commitment to innovation empowers traders with seamless, efficient, and intelligent trading solutions."

The screenshot shows the 'Bots Designer' interface. At the top, there's a 'Bot Name' input field. Below it, a section titled '1. SI' contains several tabs: 'Nifty', 'Bank Nifty', 'Midcap', and 'Portfolio'. The 'Nifty' tab is selected. Underneath the tabs, there's a checkbox labeled 'Show Stop Loss to Card'. Below this, there are two time selection fields: 'Entry Time' set to '09:29 AM' and 'Exit Time' set to '03:00 PM'. To the right of these fields is a 'Days To Run' section with buttons for 'Mo', 'Tu', 'We', 'Th', 'Fr', and 'Sa'. At the bottom of this section, there are two radio buttons: 'Strategy Target Profit' (selected) and 'Strategy Stop Loss'. Below these are two buttons: '+ Add Bot' and 'Cancel'. At the very bottom, there are 'Cancel' and 'Continue' buttons.

The screenshot shows the 'Strategy Bot Templates' interface. It features a grid of strategy templates. The first row includes 'Ready-to-use Strategy Templates', 'Momentum Master' (with a description, required capital of ₹10L, and a 'Build Bot' button), and 'Macro Magic' (with a description, required capital of ₹2L, and a 'Build Bot' button). The second row includes 'Silent Killer' (with a description, required capital of ₹5L, and a 'Build Bot' button), and 'Market Juggler' (with a description, required capital of ₹5L, and a 'Build Bot' button). The third row includes 'Options Oracle' (with a description, required capital of ₹5L, and a 'Build Bot' button). The bottom section is titled '2 Legged Strategies' and includes 'Bearish Call Spread' and 'Bullish Put Spread', each with a description and a 'Build Bot' button.
