

Pump Technical Services Ltd - Your Trusted Supplier of Jung Pumpen Products in the UK

Jung Pumpen, Jung Pumps

PUMP TECHNICAL SERVICES LIMITED

Cleveland, Aberdeen Mar 20, 2025 ([IssueWire.com](https://www.issuewire.com)) - Pump Technical Services Ltd is a leading supplier of [Jung Pumpen](#) products in the UK, offering high-quality pumps, lifting stations, and wastewater management solutions. With extensive industry knowledge and specialist training, the company provides sales, servicing, and repair solutions for a wide range of Jung Pumpen systems, ensuring reliability and efficiency in drainage, sewage, and sanitation applications.

About Jung Pumpen

Jung Pumpen has been an industry leader in pump technology since 1924. Founded by Heinrich Christian Jung in Germany, the company revolutionized wastewater management by developing the world's first submersible pump in 1954. Today, Jung Pumpen is known for its precision engineering, durable construction, and high-performance pumps used across residential, commercial, and industrial sectors.

All Jung Pumpen products are manufactured in Germany and undergo rigorous quality control to ensure long-term performance. With a team of more than 365 employees, the company continues to innovate, offering advanced solutions for wastewater and drainage management.

Jung Pumpen Product Range

Jung Pumpen designs and manufactures a wide range of products tailored for efficient drainage and wastewater disposal. The product lineup includes:

- **Jung Pumps - Submersible, drainage, and sewage pumps for various applications**
- **Lifting stations - Wastewater disposal solutions for homes and businesses**
- **Sewage pumping stations - High-capacity systems for commercial and municipal use**
- **Control units - Advanced monitoring and automation for pump performance**

Among the most widely used Jung Pumpen models available in the UK are:

U3K - A versatile submersible drainage pump for domestic wastewater

U3K Spezial - Designed for chemically aggressive wastewater applications

Trashmaster - Engineered to handle wastewater containing solid debris

Foulmaster - A powerful sewage and waste disposal pump

Plancofix - An innovative pump designed for low-level shower drainage installations

Pump Technical Services Ltd - UK's Specialist Supplier

As a dedicated supplier of Jung Pumpen products, Pump Technical Services Ltd provides a full range of pumps, spare parts, and accessories to customers across the UK. The company offers expert guidance in selecting the right pump for each application, ensuring maximum efficiency and performance.

With extensive experience in Jung Pumpen systems, the team at Pump Technical Services Ltd ensures that every pump is correctly specified and installed. Whether for residential, commercial, or industrial use, customers can rely on their expertise for high-quality solutions.

[Jung Pumpen](#) **Maintenance and Repair Services**

Jung Pumpen systems are designed for durability, but regular servicing is essential to maintain peak performance. Pump Technical Services Ltd offers a range of maintenance and repair services, including:

Routine servicing - Regular inspections to keep pumps operating efficiently

On-site pump inspections - Thorough checks on components, filters, and overall performance

Emergency repairs - Fast and reliable repair services to address pump failures

With a team of highly trained engineers, Pump Technical Services Ltd ensures that Jung Pumpen systems are always operating at their best. Preventative maintenance helps avoid unexpected failures and extends the lifespan of the equipment.

Why Choose Pump Technical Services Ltd

Customers looking for reliable Jung Pumpen solutions benefit from working with a specialist supplier. Key advantages of choosing Pump Technical Services Ltd include:

Expertise in Jung Pumpen products - A supplier focused exclusively on Jung Pumpen systems

Manufacturer-approved servicing - Professional maintenance and repairs using genuine parts

Highly trained engineers - Specialists with in-depth product knowledge

Fast and efficient service - Quick response times for sales, servicing, and repairs
