Advanced Generative AI Certification Course

In collaboration with E&ICT Academy, IIT Guwahati

Program Highlights:

- Learn To Build Your Own Gen AI & GPT Like:

- 100% Job Support
- Upto 30% Scholarship
- Live 1:1 Doubt Sessions
- Guaranteed Internship

Noida, Uttar Pradesh Feb 27, 2025 ([Issuewire.com](https://www.issuewire.com)) - The IoT Academy, Sector 62, Noida, Uttar Pradesh, India: The IoT Academy, a leader in providing high-quality tech education, is proud to announce the launch of its highly anticipated Generative AI Certification Course, developed in collaboration with the prestigious **E&ICT Academy, IIT Guwahati**. This course aims to equip learners

with the latest skills in artificial intelligence, focusing on Generative AI – one of the most transformative and rapidly evolving fields in tech today.

Get Enrolled in the Best Generative AI Course

As artificial intelligence continues to revolutionize industries, businesses need professionals who are well-versed in the latest AI advancements. The Generative AI Certification Course is designed to address this demand by offering an in-depth curriculum that covers everything from the fundamentals of AI to advanced concepts in Generative AI, such as deep learning, machine learning, and neural networks.

By collaborating with **IIT Guwahati's E&ICT Academy**, **The IoT Academy** provides students with a unique learning experience backed by world-class faculty and hands-on projects. The course is designed to cater to professionals looking to deepen their expertise in AI and those aspiring to enter this exciting field.

Why Choose the Generative AI Certification Course?

This comprehensive Gen AI certification course offers students the opportunity to learn from industry experts and gain practical experience with real-world applications of Generative AI. Master 20+ tools and skills, including natural language processing, deep learning, neural networks, and generative adversarial networks (GANs), to build and deploy cutting-edge AI models. Here are some of the [Generative AI course](#) highlights:

- **Collaboration with IIT Guwahati:** Benefit from the expertise and reputation of one of India's premier institutions.
- **Comprehensive Curriculum:** Master key AI concepts, including machine learning, deep learning, and advanced generative models like Chat GPT, Gemini, DeepSeek, and more.
- **Hands-On Learning:** Engage in practical projects and case studies to apply your learning in real-world scenarios.
- **Flexible Learning:** Access online lectures, study materials, and assignments at your own pace.
- **Certification:** Receive a globally recognized certification upon successful completion of the course, boosting your career prospects in the AI industry.
- **Job Support:** Get 100% free placement support with personalized career guidance.

Course Details:

- **Duration:** 6 Months / 6 Hours Per Week
- **Mode of Learning:** Online with live sessions and recorded content
- **Projects:** 10+ live industry projects
- **Target Audience:** Professionals, students, and anyone interested in pursuing a career in Generative AI

Words from the CEO

Speaking about the course, **CEO Mr. Kaushlendra Singh Sisodia** expressed:

"At The IoT Academy, we strive to provide our students with the best-in-class education that meets the demands of the tech industry. This new collaboration with IIT Guwahati's E&ICT Academy is a step forward in empowering professionals and aspiring AI experts with the skills required to excel in the

rapidly growing field of Generative AI."

About The IoT Academy

The IoT Academy is a leading institution dedicated to offering world-class training and certifications in the field of emerging technologies. With a focus on the Internet of Things (IoT), AI, and other cutting-edge domains, The IoT Academy has successfully trained over 10,000 professionals globally, equipping them with the skills needed to thrive in today's digital world. In addition to the Generative AI Course, The IoT Academy offers various programs including IoT/Embedded Systems, Data Science and Machine Learning, Data Analytics, Java Full-Stack, Digital Marketing, and more.
