

Ahmedabad-Based Edge International Invests in Eco-Friendly Shirt Dyeing

Ahmedabad, Gujarat Mar 19, 2025 ([IssueWire.com](https://www.issuewire.com)) - Edge International, a major [shirt manufacturer in Ahmedabad](#), has strategically invested in eco-friendly shirt dyeing technology, amplifying its commitment to green manufacturing practices. Doing so will significantly decrease the dyeing process's effect on the environment without affecting the high standards we got used to at competitive prices.

Embracing the water reduction and lesser chemical use, the new dyeing process is essentially conventional yet greener. At the same time, Edge International has upgraded to use machinery that optimises energy use and avoids further carbon emissions, showing its support for a greater cause.

"This investment in eco-friendly dyeing technology is a key milestone in Edge International's growth journey", said the CEO of Edge International. "As an Ahmedabad-based shirt manufacturer, we respect the need to lower our carbon footprint."

The shirts are dyed using the eco-friendly method to ensure better colour fastness and a softer finish over time, which, in turn, provides added comfort. Through this sustainable change, Edge International aims to target local and international markets.

In business since [Year], Edge International has become a name to be trusted when it comes to men's shirt manufacturers in Ahmedabad. Where our products have received much praise locally, our exporters have also been in demand by markets overseas.

The existing relationship that customers have shared with Edge International would be strengthened with a product that not only has the desired excellence but is also environmentally conscious.
