

Andrew T. Dailey, MD: Leading Expert in Neurosurgery and Spine Care at the University of Utah

Advancing Spinal Health with Innovation, Expertise, and Compassion

New York City, New York Mar 11, 2025 ([IssueWire.com](https://www.issuewire.com)) - The University of Utah proudly announces that Andrew T. Dailey, MD, a distinguished Professor of Neurosurgery and Adjunct Professor of Orthopaedics, is advancing the field of spinal health as the Chief of the Spine Division in the Department of Neurosurgery.

With a remarkable career spanning over two decades, Dr. Dailey is recognized nationally for his expertise in spinal cord injuries, spine trauma, degenerative cervical diseases, and spinal deformities. Practicing at multiple esteemed institutions, including the Clinical Neurosciences Center, Huntsman Cancer Institute, University of Utah Hospital, and Intermountain Primary Children's Neurosurgery Clinic - Salt Lake City, he is committed to providing exceptional care to patients with complex spine conditions.

Dr. Dailey's extensive medical training began at Columbia University's College of Physicians and Surgeons, followed by comprehensive neurosurgical training at the University of Washington. Additionally, his experience as Senior Registrar at St. George's Medical School and Atkinson Morley's Hospital in London, as well as his fellowship in orthopedics and neurological surgery at the University of Washington, has equipped him with a global perspective on neurosurgery.

Board-certified by the American Board of Neurological Surgery, Dr. Dailey is an active member of several prestigious organizations, including the American Association of Neurological Surgeons, the Congress of Neurological Surgeons, the Lumbar Spine Research Society, and the Cervical Spine Research Society. His contributions to the field extend beyond clinical practice; he has played a pivotal role in establishing evidence-based spine guidelines on a national level, ensuring that patients receive the highest standard of care.

With over 140 peer-reviewed publications to his name, Dr. Dailey is not only a practitioner but also a thought leader in neurosurgery. His research has significantly influenced the understanding and treatment of various spine-related conditions, making him a sought-after expert for both patients and healthcare professionals alike.

Dr. Dailey's commitment to education and patient advocacy is evident in his role as an educator at the University of Utah, where he trains the next generation of neurosurgeons. His dedication to advancing neurosurgical techniques and improving patient outcomes continues to inspire colleagues and students.
