

## **Anton Williams Holding Co of Kalamazoo and GMNF Grand Rapids Build Global Health Care Network**

**Kalamazoo, Michigan Feb 8, 2026 ([IssueWire.com](http://IssueWire.com))** - Anton Williams Holding Company of Kalamazoo MI and GMNF Global of Grand Rapids MI have launched a new cooperative program that unites pharmaceutical, medical device, insurance and hospitals/health clinics globally in providing services to patients. This new program includes internal projects at align with partner and sponsee organizations objectives in providing patient care. A prior program that included medical technology such as switches, routers for connectivity will be incorporated into this latest platform

Medical personnel such as physicians, physician assistants, nurses, nursing assistants as well as non medical staff who work at various organizations globally are spending some of their time treating patients. Medical devices are being donated sent to hospitals, health clinics in need to improve the quality of their coverages. For some health clinics and physician offices the new medical devices are a significant upgrade to their former equipment. Some smaller supplies include sterile blades, tablet cutters, syringes. Anti-inflammatory drugs such as Meloxicam and Ibuprofens are being sent from pharmaceutical organizations to provide care to patients as well.

Anton Williams the company owner is a 9th generation businessman. The initial businesses that were started in the U.S. began with David Williams of London who migrated to the Mississippi-Louisiana region in the 1760s and launched real estate, cotton, timber and corn businesses. Anton's lineage includes Archie P. Williams who was a mixed race slave owner in the antebellum period and was the great grandson of David Williams and became a million through inheritance. Archie P Williams added Oil and Gas to the family businesses in the early 20th century that has continued in various forms into the present with Anton R Williams today being the majority owner. Some oil is refined to create medical devices and petrochemicals are used to create pharmaceuticals. The new program of AWHC and GMNF includes pharmaceuticals and medical devices manufactured and sent from other organizations.
