

Beyond Intranet Unveils Next-Generation Power BI Consulting Services

Chicago, Illinois Mar 17, 2025 ([IssueWire.com](https://www.issuewire.com)) - Beyond Intranet is excited to announce its latest suite of [Power BI Consulting Services](#), offering bespoke integrations and advanced Power BI customization for enterprises seeking to optimize their data-driven decision-making frameworks. This innovative service is tailored to meet the precise needs of both early adopters and seasoned Power BI users, ensuring that every company has access to the insights required to excel.

Service Differentiators:

- **Flexible Engagement Models:** Clients benefit from various engagement options—from hourly and monthly consulting services to full-scale project implementations. This flexibility makes it easier for businesses to integrate Power BI within their existing ecosystems, regardless of size or complexity.
- **Extensive Integration Capabilities:** Beyond Intranet's expertise stretches across a range of integrations. Their [Power BI dashboards](#) can draw data from diverse sources—spanning on-premises solutions and the cloud—to deliver a consolidated view that includes sources such as SharePoint, MS Teams, Oracle, SQL Server, and many more.
- **Data-Driven Visualization and Security:** The consulting framework emphasizes creative visualization with an extensive charting library and user-specific designs, ensuring that each report not only provides insights but also adheres to the highest levels of security and data accuracy.
- **Empowering a Global Clientele:** With projects handled across key markets—including the United States, Australia, Canada, and the Middle East—the service stands as a testament to Beyond Intranet's commitment to local compliance and global standards.

“Modern businesses require agility and precision,” said a spokesperson for Beyond Intranet. “Our approach to [Power BI consulting](#) integrates advanced [data warehousing](#), custom dashboards, and real-time insights—all supported by a global delivery model. We enable our clients to connect with data like never before, creating a competitive edge that translates directly to improved business performance.”
