

# CyberMindr Hosts CISO Roundtable on Cyber Warfare Strategies for 2025

Top cybersecurity experts shared critical insights on evolving threats, proactive defense, and regulatory challenges at an exclusive CISO gathering.

**Tysons Corner, Virginia Feb 8, 2026 ([IssueWire.com](https://www.issuewire.com))** - CyberMindr hosts its exclusive CISO Meetup Series event, *The CISO Blueprint: Staying Ahead in Cyber Warfare 2025*, at the Hyatt Regency Tysons Corner in Virginia. This marks the first roundtable of the series to be held in the U.S., the invite-only roundtable brings together top cybersecurity executives and industry experts to tackle emerging cyber threats, share real-world defense strategies, and provide actionable solutions for strengthening organizational security.

With cyber threats evolving at an unprecedented pace, security leaders must stay ahead of attackers. At the event, industry experts broke down the most pressing challenges businesses face and outlined strategies to mitigate risk before attacks escalate.

*"The biggest challenge in cybersecurity today isn't just stopping attacks—it's predicting them. Organizations that embrace intelligence-driven security can stay ahead of threats rather than constantly playing catch-up," said Srinivasa Veeramasu, Chief Executive Officer, CyberMindr.*

The panel discussions examined the cyber landscape of 2024, analysing attacks from both an attacker and defender perspective, and provided insights into what security teams should prepare for in 2025. Experts shared how businesses can leverage automation, threat intelligence, and AI-driven security solutions to detect and stop attacks before they cause harm. Additionally, the discussion covered the

complexities of regulatory compliance, offering guidance on maintaining compliance without compromising business agility. Crisis response and cyber resilience were also key focal points, equipping attendees with practical tactics to strengthen their organizations against evolving cyber risks.

*"Attackers are leveraging automation and AI to launch increasingly sophisticated threats, making it critical for organizations to adopt advanced defenses. Continuous threat exposure validation and proactive security strategies are no longer optional—they are essential to minimizing risk," said Sudheer Kanumalli, Chief Technology Officer, CyberMindr.*

Industry leaders, including Brett Gordon, Vice President at CyberMindr; Mike Prado, Deputy Assistant Director at DHS Cyber Crimes Center; Jessica Clark, Senior Cyber Security Engineer at Vikheda; Ronald Appel, Vice President at Harmonia Holdings Group, LLC; and Sudheer Kanumalli, Chief Technical Officer at CyberMindr, shared their expertise on navigating the evolving cyber threat landscape. Their insights provided security leaders with exclusive strategies, actionable defense measures, and valuable industry connections, reinforcing the importance of a proactive security approach and the critical role CISOs play in protecting organizations from emerging threats.
