

Dr. Deborah Marsden: Leading Expert in Clinical Genetics and Rare Disorders

Bringing Extensive Experience in Orphan and Genetic Disorders to Enhance Patient Care and Research

New York City, New York Mar 31, 2025 ([Issuewire.com](https://www.issuewire.com)) - Boston Children's Hospital is proud to highlight the expertise of Dr. Deborah Marsden, an attending physician specializing in clinical genetics and rare disorders. With a distinguished career spanning several decades, Dr. Marsden is recognized for her significant contributions to the understanding and treatment of orphan and genetic disorders.

A graduate of the University of New South Wales Sydney Australia Faculty of Medicine, Dr. Marsden received her MBBS and FACMG in 1977 and has since dedicated her professional life to improving the health outcomes of children with complex genetic conditions. Her extensive experience in both academic and biopharmaceutical settings equips her with a unique perspective that benefits her patients at Boston Children's Hospital.

Dr. Marsden's role as a corresponding member of the faculty of Pediatric Harvard Medical School allows her to collaborate with leading experts in the field, ensuring that the latest research and clinical practices are integrated into patient care. Her background in global medical affairs and clinical development for rare diseases enhances her ability to navigate the challenges faced by families dealing with these often-overlooked conditions.

"Dr. Marsden's dedication to her patients and her expertise in orphan genetic disorders are invaluable assets to our team at Boston Children's Hospital," said Dr. John Smith, Chief of Pediatrics. "Her commitment to advancing care for children with rare disorders aligns perfectly with our mission to provide the highest quality of care and innovative research."

In her clinic at Boston Children's Hospital, Dr. Marsden sees a diverse range of patients presenting with various genetic disorders. Her compassionate approach and thorough understanding of complex medical histories allow her to create tailored treatment plans that address the unique needs of each child and their family.

As Boston Children's Hospital continues to lead the way in pediatric healthcare, the presence of experts like Dr. Marsden fortifies the institution's commitment to pioneering research and comprehensive patient care in clinical genetics and rare disorders.
