

Lauren Marasa, MD: Pioneering a New Era in Psychiatric Care Through Compassionate Interventions

Founder of Norcal Neurostimulation Combines Expertise in Interventional and Forensic Psychiatry to Transform Lives

New York City, New York Mar 19, 2025 ([IssueWire.com](https://www.issuewire.com)) - Dr. Lauren Marasa, a double board-certified psychiatrist and the visionary Founder and CEO of Norcal Neurostimulation, is redefining the landscape of mental health care through her unique blend of interventional and forensic psychiatry. With an extensive educational background and a profound commitment to patient-centered care, Dr. Marasa is accepting new patient consultations for innovative psychiatric interventions.

Dr. Marasa graduated Magna Cum Laude from the University of Alabama's Honors College, where she studied biology and Spanish. She furthered her education at the University of South Carolina School of Medicine, graduating Cum Laude at the top of her class. Initially aspiring to be a neurosurgeon, Dr. Marasa matched into a prestigious residency at the University of Kentucky Medical Center. However, after two years of rigorous training, she recognized her passion for forging deeper connections with patients, prompting her transition to psychiatry.

After completing four years of general psychiatry training, Dr. Marasa served as Chief Resident and later pursued a Fellowship in Forensic Psychiatry at the University of California, Davis. In addition to her clinical work, she actively engages in the legal arena as an expert witness, providing valuable insights into civil and criminal matters related to mental health. Dr. Marasa firmly believes that the most effective expert witnesses are those who prioritize patient care above all else.

"I believe that no one cares what you know until they know that you care," Dr. Marasa states. This philosophy drives her approach to treatment, as she specializes in addressing treatment-resistant depression and other refractory psychiatric disorders through personalized interventions such as TMS (Transcranial Magnetic Stimulation), Spravato, and ECT (Electroconvulsive Therapy).

At Norcal Neurostimulation, Dr. Marasa is dedicated to crafting individualized treatment plans tailored to the unique needs of each patient. Her innovative methods and empathetic approach aim to empower individuals on their journey to mental wellness.
