

LORGAR™ Introduces the Next Generation of Gaming Monitors

Limassol, Cyprus Mar 25, 2025 ([Issuewire.com](https://www.issuewire.com)) - Revolutionary MiniLED technology, breathtaking visuals, and immersive audio for the ultimate gaming experience.

LORGAR™, the brand renown for pushing the boundaries of gaming technology, is proud to introduce its first-ever MiniLED gaming monitors: the Gaming Monitor Pro 27MP1 and Gaming Monitor Pro 34MP1. Engineered for unmatched clarity, speed, and immersion, these displays mark the beginning of a new era in high-performance gaming. And this is just the beginning – even more groundbreaking models are on the way.

Gaming Without Limits

Imagine stepping into a world where every detail is rendered with incredible precision.

The Gaming Monitor Pro 27MP1 features a UHD 4K resolution (3840×2160) and HDR 1000 technology, delivering stunningly vivid colors, deep blacks, and razor-sharp contrasts.

The Gaming Monitor Pro 34MP1 takes immersion even further with a 34-inch curved 1500R screen and UWQHD resolution (3440×1440), wrapping you in the action like never before.

But it's not just about visuals – performance is at the core. With refresh rates of 160 Hz (27MP1) and 180 Hz (34MP1), plus an ultra-fast 1ms response time, every frame is delivered with exceptional

precision and smoothness, eliminating lag and motion blur for a seamless gaming experience.

Precision Lighting & Immersive Audio

Thanks to MiniLED backlight technology with 2304 local dimming zones, these monitors offer industry-leading contrast and lighting control, ensuring that every shadow and highlight appears exactly as intended. A peak brightness of 1000 nits guarantees stunningly realistic visuals that bring your games to life.

Gaming isn't just about what you see – it's about what you hear. The built-in front 2.1-channel audio system delivers every explosion, soundtrack, and dialogue line with clarity and depth, fully immersing you in the game.

Tailored for Every Gamer

Customization is key. The Gaming Monitor Pro series features adjustable RGB lighting, allowing you to set the perfect gaming atmosphere. Full LORGAR PLATFORM integration lets you fine-tune settings for the best gaming experience, while the ergonomic stand provides full adjustability, including tilt, height, and swivel options—plus a built-in headset hanger for added convenience.

Seamless Connectivity

Whether you're a PC or console gamer, the Gaming Monitor Pro lineup has you covered. With HDMI 2.1, DP 1.4, USB (A/B/C), and Audio Out, you'll have all the connectivity options you need for an effortless setup.

Step into the future of gaming with the Gaming Monitor Pro series by LORGAR™. Choose your model, elevate your experience, and dominate the game.
