

MediMobile Hits the Road for Spring Trade Shows, Showcasing Genesis: The Future of Medical Coding

Georgetown, Texas Mar 27, 2025 ([IssueWire.com](https://www.issuewire.com)) - MediMobile Hits the Road for Spring Trade Shows, Showcasing Genesis: The Future of Medical Coding

MediMobile, a leader in AI-powered medical coding solutions, is proud to announce its participation in several major healthcare trade shows this spring. The MediMobile team will be on the road showcasing **Genesis**, its breakthrough platform that eliminates manual charge capture and automates medical coding for clinicians and healthcare organizations.

Genesis is redefining how providers and revenue cycle leaders manage coding, offering real-time, AI-driven recommendations that simplify documentation and improve financial outcomes.

Healthcare professionals can experience Genesis in action at the following spring events:

ACP Internal Medicine Meeting 2025

April 3–5 | Booth #1438 | New Orleans, LA

Attendees at the American College of Physicians' Internal Medicine Meeting can explore how Genesis transforms the workflows of internists and hospitalists by automating charge capture and ensuring accurate coding within seconds.

SHM Converge 2025

April 22–25 | Booth #428 | Las Vegas, NV

Hospitalists attending SHM Converge will discover how Genesis helps reduce coder workload by up to 75%, increases coding precision, and prevents lost revenue due to manual processes and documentation errors.

TexMed 2025

May 8–10 | Booth #103 | San Antonio, TX

As a Texas-based company, MediMobile is especially excited to connect with clinicians, practice managers, and revenue cycle teams at TexMed. Visitors will see firsthand how Genesis supports local healthcare leaders with cutting-edge automation designed to scale.

What to Expect at MediMobile's Booths

Across all three shows, MediMobile will offer:

- **Live Genesis demos** that showcase real-time AI charge generation and coding recommendations.
- **1:1 consultations** with MediMobile experts to discuss your workflow needs.
- **Giveaways and swag** for attendees ready to modernize their charge capture.

About Genesis

Genesis is MediMobile's AI-powered medical coding platform that reads clinical documentation, generates CPT and ICD-10 codes, and automates charge creation—drastically improving speed, accuracy, and compliance. With Genesis, organizations can reduce operational costs by 50%, improve

coder efficiency by 75%, and minimize claim denials.

Key Features:

- AI-generated coding recommendations in seconds
- Real-time MIPS measure identification
- Existing EMR-integrated workflows
- Continuous learning and accuracy improvement via user feedback
