

Pushpanjali Eye Care Hospital Launches Asia's First AI-Powered LASIK Surgery Machine

Learn more about LASIK Eye surgery

kolkata, West bengal Mar 27, 2025 ([Issuewire.com](https://www.issuewire.com)) - Pushpanjali Eye Care Hospital is proud to announce a groundbreaking advancement in eye care with the unveiling of Asia's first AI-based machine for LASIK surgery. This revolutionary technology promises to enhance precision, reduce recovery time, and provide unmatched accuracy in vision correction procedures.

Refractive error can be cured by LASIK eye surgery. Dr Prashant Srivastava, the owner of Pushpanjali Eye Care Hospital, was aware of how AI technology helps any surgery, so he arranged an AI-based LASIK Treatment machine to cure refractive error.

There are several of the [best eye hospital in Kolkata](#) that have already invented AI-based Lasik machines. **Pushpanjali Eye Care Hospital** is one of them.

The hospital, known for its state-of-the-art facilities, has always been at the forefront of incorporating advanced medical technologies to improve patient outcomes. The new AI-powered machine will take LASIK eye surgery to the next level by using artificial intelligence to map the eye with extraordinary precision. This innovation allows for customized treatment based on each patient's unique eye structure, significantly improving the results of the surgery.

With the introduction of this AI-based machine, Pushpanjali Eye Care aims to deliver a safer, faster, and more effective LASIK surgery experience. The machine is designed to reduce human error, ensuring that every step of the surgery is as accurate as possible. Patients can expect a smoother recovery process, fewer complications, and improved visual outcomes.

“By introducing this cutting-edge AI technology, we are taking a giant leap forward in revolutionizing LASIK surgery,” said Dr. Rajesh Sharma, Chief Surgeon at Pushpanjali Eye Care. “This machine is a

game-changer for those seeking vision correction, offering a personalized and highly precise treatment that was previously unimaginable.”

The AI system uses advanced algorithms to analyze and predict the eye’s response to surgery, making the procedure even more tailored to each individual. This means that patients will experience a more efficient and less invasive procedure, with results that are both quicker and more predictable.

Pushpanjali Eye Care is excited to offer this pioneering technology to its patients, solidifying its position as a leader in advanced eye care solutions. The hospital is now accepting appointments for consultations and LASIK surgery, where patients can experience the future of vision correction firsthand.

About Pushpanjali Eye Care Hospital

Pushpanjali Eye Care Hospital is one of the leading eye care centers in the region, known for its commitment to delivering world-class treatments using the latest technological innovations.
