– Led the transformation and steady-state operations inclusive of enrollment, customer service, claims, and regulatory reporting for the government programs division during a period of **rapid growth in membership (440k to ~1m members)** and products (Medicaid, MLTSS, Medicare, Exchange).

**Alabaster, Alabama Jan 26, 2026 (IssueWire.com)** - As the competition for top positions in any field continues to intensify, job seekers need a competitive edge to stand out. ResumeInvent is committed to providing personalized, ATS-friendly resumes and cover letters that dramatically increase the chances

of landing an interview. With a specialized focus on optimizing resumes for the latest ATS algorithms, ResumelInvent ensures that clients' applications meet both human and machine expectations.

## Key Features of ResumelInvent Services:

- **Tailored Resume Writing:** Whether you're just starting your career, climbing the corporate ladder, or a seasoned executive, ResumelInvent expert writers craft resumes that highlight strengths and achievements, ensuring your skills are front and center.
- **ATS Optimization:** Leveraging the latest industry best practices, ResumelInvent designs resumes that seamlessly pass through ATS filters, using the right keywords, formatting, and structure to increase visibility and engagement.
- **Comprehensive Services:** In addition to resumes, ResumelInvent offers professional cover letter writing services that complement each resume, presenting job seekers as complete candidates with a compelling personal brand.
- **Personalized Approach:** Each resume is tailored to the client's specific career goals and the roles they are targeting. From custom keywords for niche positions to high-level executive summaries, ResumelInvent ensures that every resume is aligned with both the individual's ambitions and market demands.

## The Business Impact:

In today's job market, over 90% of large companies use Applicant Tracking Systems to screen resumes. Without ATS optimization, even the most qualified candidates may never be seen by a human recruiter. ResumelInvent offers a solution that guarantees clients' resumes get through the filters and into the hands of hiring managers.

"Our goal is simple—help job seekers at all stages of their careers land their dream jobs by making their resumes not just good, but ATS-approved," said Nimra, Founder and CEO of ResumelInvent. "We know how important first impressions are, and an ATS-friendly resume is the first step toward a successful application process."

## Why ResumelInvent?

- **Proven Results:** Our clients report higher response rates, more interviews, and faster job placements.
- **Experienced Professionals:** Our team of writers are industry veterans with deep expertise in crafting high-impact resumes that resonate with both automated systems and hiring professionals.
- **Customer Satisfaction:** ResumelInvent takes pride in its exceptional customer service, working closely with clients to revise and fine-tune resumes and cover letters until they're perfect.

As companies continue to adopt new technologies for recruitment, it's essential that job seekers have resumes that can navigate these tools effectively. ResumelInvent comprehensive, ATS-optimized services give applicants a powerful advantage in today's competitive job market.

# Alice Stern

Senior Software Developer | Full Stack Development

l 202.555.1234 | a.stern@gmail.com | github.com/Alster

Strategic and results-driven Senior Software Developer with a proven track record of success, specializing in the design, development, and deployment of high-quality web and mobile applications. Proficient in Java, Python, C++, C, C#, Go, JavaScript, React, Node.js, and PostgreSQL. Experience in Java, Python, Django, Swift, iOS, Android, MySQL, PostgreSQL, MongoDB, and MySQL databases. Skilled in unit testing, continuous integration, and the DevOps lifecycle. A strong believer in Agile methodologies, with experience in CI/CD pipelines and design pattern implementation. Recognized for driving innovation and delivering high-performance applications.

## Alice Stern

Senior Software Developer

I am a senior software engineer with a passion for creating innovative and impactful applications.

### EXPERIENCE

**Senior Software Developer | Blockchain | MBS**

• Implemented a new feature for a blockchain-based platform, resulting in a 20% increase in user engagement and satisfaction.

• Developed a React-based web interface using Node.js and PostgreSQL, streamlining communication between clients and servers.

• Developed a distributed software architecture using Docker and Kubernetes, resulting in a 40% reduction in deployment time and a 30% increase in system availability.

• Implemented a real-time reporting and monitoring system using Python and PostgreSQL, enabling faster decision-making and faster troubleshooting.

• Developed a machine learning model for fraud detection using TensorFlow and Python, achieving a 95% accuracy rate.

**Software Developer | Blockchain | MBS**

• Successfully maintained a blockchain and ensured it met the needs of the organization, resulting in a 15% increase in user satisfaction.

• Developed a real-time reporting system using Python and PostgreSQL.

• Integrated a suite of payment and financial services into a single platform using Node.js and PostgreSQL.

• Developed a distributed software architecture using Docker and Kubernetes, resulting in a 30% reduction in deployment time.

• Implemented a real-time reporting and monitoring system using Python and PostgreSQL, enabling faster decision-making and faster troubleshooting.

• Developed a machine learning model for fraud detection using TensorFlow and Python, achieving a 95% accuracy rate.

**Software Developer | Blockchain | MBS**

• Successfully maintained a blockchain and ensured it met the needs of the organization, resulting in a 15% increase in user satisfaction.

• Developed a real-time reporting system using Python and PostgreSQL.

• Integrated a suite of payment and financial services into a single platform using Node.js and PostgreSQL.

• Implemented a real-time reporting and monitoring system using Python and PostgreSQL, enabling faster decision-making and faster troubleshooting.

• Developed a machine learning model for fraud detection using TensorFlow and Python, achieving a 95% accuracy rate.

### TECHNICAL SKILLS

**Blockchain**

- Solid understanding of blockchain concepts and implementation.
- Developed a 20% increase in user engagement and satisfaction.
- Implemented a distributed consensus mechanism using a custom-built tool, resulting in a 40% reduction in deployment time.

**Design and Implementation**

- Designed and implemented a real-time reporting and monitoring system using Python, which improved problem detection accuracy by 50%.
- Developed a distributed software architecture using Docker and Kubernetes, resulting in a 30% reduction in deployment time.
- Developed a machine learning model for fraud detection using TensorFlow and Python, achieving a 95% accuracy rate.

**Machine Learning**

- Developed a real-time reporting and monitoring system using Python and PostgreSQL, enabling faster decision-making and faster troubleshooting.
- Developed a distributed software architecture using Docker and Kubernetes, resulting in a 30% reduction in deployment time.
- Implemented a real-time reporting and monitoring system using Python and PostgreSQL, enabling faster decision-making and faster troubleshooting.
- Developed a machine learning model for fraud detection using TensorFlow and Python, achieving a 95% accuracy rate.

### PROJECTS

**Blockchain Project**

Developed a real-time reporting and monitoring system using Python and PostgreSQL, resulting in a 15% increase in user satisfaction.
