

Revolutionizing Healthcare: Beau Gedrick, DO, Launches Flex Health Concierge Medical Clinic in Evans, Georgia

Delivering Personalized, Membership-Based Healthcare Designed to Break Down Barriers for Patients and Physicians

New York City, New York Mar 11, 2025 ([IssueWire.com](https://www.issuewire.com)) - Dr. Beau Gedrick, DO, a board-certified physician specializing in emergency medicine and primary care sports medicine, is excited to announce the opening of Flex Health Concierge Medical Clinic. Located in Evans, Georgia, Flex Health is co-owned by Dr. Gedrick and his wife, Dr. Brooke Gedrick, DO. This innovative clinic aims to transform the healthcare experience by providing patients with accessible, personalized, and consistent care without the constraints of traditional insurance models.

Flex Health was born out of the frustrations that Drs. Gedrick observed the conventional healthcare system. With a deep understanding of the challenges faced by both patients and healthcare providers, they set out to create a clinic that prioritizes patient well-being over bureaucratic hurdles. “We recognized that the traditional healthcare system often leaves patients feeling lost, frustrated, and unsupported. Our goal with Flex Health is to provide a sanctuary of healing where patients can receive the care they truly deserve.”

At Flex Health, the focus is on delivering comprehensive services that include primary care, urgent care, sports medicine, weight loss medicine, and esthetics—all through a membership-based model. This innovative approach allows patients to pay a monthly fee for a wide range of services, eliminating the financial burden often associated with insurance. Members benefit from an array of offerings, including office visits, access to a user-friendly patient portal, telehealth services, video conferencing, and direct communication with healthcare staff through an office messaging system.

Dr. Gedrick’s extensive background in medicine informs the clinic’s philosophy. He grew up in Clinton, Indiana, and attended Butler University, where he was an athlete before shifting his focus to medicine. After earning a Bachelor of Science Degree in Biology and a minor in Chemistry in 2000, he worked for Pfizer Pharmaceuticals before pursuing medical education.

While attending medical school at NSU’s College of Osteopathic Medicine, Dr. Gedrick completed a one-year fellowship in osteopathic manipulation. He then pursued an emergency medicine residency at Henry Ford Macomb Hospital in Detroit, where he worked with the Detroit Red Wings’ physicians. After residency, he completed a primary care sports medicine fellowship at NSU-COM and became a team physician for the NSU Sharks and medical director of the athletic training program.

Dr. Gedrick joined the Medical College of Georgia in 2016 as an associate professor in emergency and sports medicine. He served as a team physician for the Augusta GreenJackets, Augusta University Jaguars, and local high schools while also acting as medical director for the Augusta Ironman and Paceline. Additionally, he led the Ortho On-Demand clinic and was a faculty member for the Sports Medicine Fellowship in the Family Medicine Department, further solidifying his expertise in patient care.

With over 15 years of experience, Dr. Gedrick holds board certifications in emergency medicine, sports medicine, and osteopathic manipulation. He is an active member of several prominent medical organizations, including the American College of Osteopathic Emergency Physicians, the American Osteopathic Association, the American Osteopathic Academy of Sports Medicine, the American College of Emergency Physicians, and the American Medical Society for Sports Medicine.

Recognizing the importance of giving back, Dr. Gedrick founded the Flex Sports Foundation in 2023 to support underserved athletes in the Central Savannah River Area (CSRA). This initiative aims to provide resources and care for young athletes who may otherwise lack access to necessary medical attention, thereby nurturing the next generation of sports talent.

Dr. Gedrick’s commitment to innovative healthcare is matched by his desire to create a positive impact

on the community. He believes that the future of medicine lies in fostering relationships between patients and physicians. “At Flex Health, we’re not just treating symptoms; we’re building partnerships with our patients to enhance their overall health and wellness,” he states.

On a personal note, Dr. Gedrick enjoys spending time with family, and his favorite vacation destination is the eco-archaeological park of Xcaret in Mexico, known for its stunning natural beauty and rich cultural experiences. It reflects his belief in the importance of balancing work with relaxation and adventure.

Flex Health Concierge Medical Clinic is now accepting members and invites the Evans community and all surrounding areas to experience a new approach to healthcare—one that prioritizes patient-centered care and accessibility.
