

RPG Squarefoot Solutions Inc. Partners with HP to Offer Revolutionary SitePrint Robot for Construction Layout

RPG, Inc. has been named a regional dealer for HP's SitePrint Robot, a cutting-edge autonomous solution that enhances construction layout efficiency. This robot prints directly onto jobsite slabs with precision, reducing labor-intensive marking .

Arlington, Virginia Jan 25, 2026 ([IssueWire.com](https://www.IssueWire.com)) - RPG, Inc., a leading provider of technology and data solutions for the construction industry, is proud to announce that it has been authorized as the regional dealer for HP's SitePrint Robot.

This strategic partnership marks a significant milestone for RPG and reinforces our commitment to delivering cutting-edge solutions that redefine efficiency, productivity, sustainability and competitiveness for our clients. As a regional dealer for [HP's SitePrint Robot](#), we are excited to offer our customers access to the latest advancements in autonomous printing – literally at the point of use.

The HP SitePrint Robot is a state-of-the-art solution designed to accelerate the building or manufacture building layout process. Using HP's printing know-how combined with robotics technology, the SitePrint Robot prints direct onto jobsite slabs with extreme accuracy - line data derived from the project's native

design layout files. The SitePrint robot addresses the labor intensive, measure-and-mark work currently used during the building process. With its innovative features and robust capabilities, the SitePrint Robot prints lines and marks and labels directly on the slab for major project disciplines like mechanical HVAC systems, electrical wiring, and partition walls. For the project stakeholders this means being 10X more productive: freeing up labor for additional work and reducing errors and re-work that results in delivering a project on time, and within budget for owners.

The HP SitePrint Robot dealership adds to RPG's other lines of construction focused HP products: the HP Designjet line of wide format printers, HP's Lite Production Wide format printer line, and the HP PageWide XL wide format production line of printers. RPG has been an authorized servicing dealer for these lines for over 20 years.

RPG also provides [Leica Geosystems 3D laser](#) scanning technology in tandem with the HP SitePrint Robot. This solution ensures extreme accuracy in mapping out the layout data to less than one eighth of an inch. Additionally, HP SitePrint's cloud-based tools incorporate the client's design files which makes layout management from the jobsite simple.

Key features of the HP SitePrint Robot include:

- Autonomous printing with obstacle avoidance
- Precision and accuracy: Deliver multi-discipline data with the SitePrint Robot's advanced printing technology
- User-friendly operations with cloud-based tools
- Compact design and rugged for jobsites

"At RPG, we are dedicated to delivering transformational technology solutions to our clients, and our partnership with HP's SitePrint Robot is a testament to that commitment," said Mark Kadonoff, Principal. "We are excited about the opportunities this collaboration presents, and we look forward to helping firms streamline their building and layout process."

RPG is confident that the addition of the HP SitePrint Robot to our product lineup will elevate our offerings and provide our clients with a competitive edge in building and manufacturing market. This partnership aligns with our mission to stay at the forefront of technological advancements and deliver value-driven solutions to our customers.

For more information about HP's SitePrint Robot and our comprehensive range of supportive products and services, please contact Jeff McConnell at 301-498-32225 or jmccConnell@rpg.com. Also, visit www.rpg.com for our next event featuring the HP SitePrint robot.

About RPG: RPG is a woman-owned small business with over three decades of experience providing products and services to the Mid-Atlantic's building sector. We team with globally renowned brands enabling us to provide the most cutting-edge products, featuring the latest in technology, reality capture, digital solutions, printing, and graphics printing solutions, to continuously move business forward. Our business philosophy is centered on understanding and addressing our client's unique challenges with state-of-the-art hardware, advanced software, and comprehensive IT solutions.
