Tampa Bay Storyteller Captures Century of Automotive Innovation Through Compelling Characters and Historical Detail in Latest Addition to Acclaimed Industrial America Series

Tampa, Florida Mar 19, 2025 ([IssueWire.com](https://www.IssueWire.com)) - Award-winning author and storyteller Jim Kissane has announced the release of his fifth book, "Automobile Stories," the latest addition to his acclaimed historical fiction series "The Story of Industrial America [1850's - 1950's]."

The new publication continues Kissane's mission of bringing America's industrial heritage to life through meticulously researched and engagingly crafted narratives. "Automobile Stories" explores the transformative impact of the automobile industry on American society, economy, and culture during a pivotal century of development.

"These stories capture not just the mechanical innovations but the human spirit behind America's love affair with automobiles," said Kissane. "From the assembly lines to the open roads, these narratives reveal how cars changed everything from our landscapes to our social dynamics."

Like his previous works, "Automobile Stories" features Kissane's signature storytelling style that blends historical accuracy with compelling characters and unexpected plot twists. The book is available in regular print, large print, and e-book formats to accommodate various reader preferences. Visit www.JimKissane.com/my-books

Kissane's unique approach to historical storytelling stems from his personal connections to industrial America. Growing up surrounded by family members who worked in heavy industries and a career working with many of these, he gained firsthand insights that inform his authentic narratives, which focus on everyday people and their experiences.

"Jim's ability to transport readers back in time while maintaining historical integrity is unmatched," noted literary critic Susan Reynolds. "His stories preserve crucial oral histories that might otherwise be lost to time."

"Automobile Stories" joins Kissane's extensive collection of over 800 original stories spanning 17 industries from America's industrial age. The author is available for live storytelling performances, both locally in the Tampa Bay area and virtually via Zoom.
