

Wellness Worx Announces Grand Opening in Flowery Branch/Braselton

Flowery Branch, Georgia Mar 12, 2025 ([Issuewire.com](https://www.issuewire.com)) - [Wellness Worx](#) is excited to announce the grand opening of its state-of-the-art wellness center in Flowery Branch/ Braselton. The event will take place on Thursday, April 17, 2025, from 4pm-7pm at 7316 Spout Springs Road Suite 202, Flowery Branch, GA 30542 and will offer the community a firsthand look at the cutting-edge health and wellness services available.

At Wellness Worx we believe in uncovering the root causes of your health concerns, not just treating the symptoms. We are dedicated to providing innovative and holistic healthcare solutions, focusing on hormone therapy, IV hydration, weight management, and aesthetics to include Botox and fillers, DEXA scans, VO2 Max metabolic testing, regenerative medicine, sexual wellness, peptide therapy, comprehensive blood panels, cognitive therapies, and other options. The clinic aims to help individuals achieve optimal health through personalized treatments and expert medical guidance.

“Our mission is to empower individuals to take control of their health through science-based, natural, and personalized wellness solutions,” said Tracy Youngblood-McDaniel. “We are thrilled to introduce our services to the community and look forward to making a lasting impact on the well-being of our clients.”

Insulin resistance is a silent but widespread metabolic dysfunction that often goes undiagnosed, leaving millions struggling with unexplained weight gain, fatigue, and difficulty losing weight—even when using GLP-1 medications like [Semaglutide or Tirzepatide](#). Without proper diagnosis and targeted intervention, individuals may not see the expected results from their weight loss treatments and, worse, may unknowingly be accelerating the progression toward type 2 diabetes and other metabolic disorders.

We recognize that weight loss is not just about medication—it’s about understanding and optimizing your body’s metabolic health. Many people start GLP-1 medications without a full picture of their underlying hormonal and metabolic imbalances. Without comprehensive blood panels and metabolic assessments, insulin resistance can continue to worsen, leading to persistent weight challenges, energy crashes, and inflammatory conditions that further complicate overall health.

Through advanced metabolic testing, we can identify insulin resistance early, address underlying hormonal imbalances, and create tailored treatment plans that support long-term weight management, sustainable metabolic health, and overall well-being. By integrating GLP-1 therapies with peptides, targeted nutrition, hormone balancing, and metabolic support, we help our patients achieve real, lasting results—rather than temporary or frustrating plateaus.

Grand Opening Highlights:

- Ribbon-Cutting Ceremony with local officials and special guests
- Exclusive Discounts & Giveaways for attendees
- Free Mini Wellness Consultations & Demonstrations of select services
- Networking & Refreshments with local health and wellness professionals
- Raffle Prizes & Grand Opening Specials for new patients

The event is open to the public, and all are encouraged to attend. Guests will have the opportunity to tour the facility, meet the expert team, and experience select wellness services firsthand.
