

Whitedogs: A Revolutionary Telegram-Based Crypto Mining & Rewards Platform on TON

London, United Kingdom Mar 6, 2025 ([IssueWire.com](https://www.issuewire.com)) - Whitedogs, an innovative crypto-mining and rewards platform built on The Open Network (TON), is redefining the way users engage with digital assets. Designed as a Telegram-based ecosystem, Whitedogs offers a seamless and gamified experience where users can earn and mine cryptocurrency by completing tasks, playing games, and inviting friends.

What is Whitedogs?

At its core, Whitedogs introduces a dual-reward system:

- **xWTD (Points System):** Users earn xWTD by completing various in-app activities such as daily tasks, trivia games, and referrals.
- **WTD (Real Token):** xWTD can then be used to acquire virtual dog breeds, which mine WTD, the official token of the *Whitedogs* ecosystem.

This innovative approach ensures active participation while providing an engaging and rewarding experience for users.

Expanding Beyond Mining: The Future of Whitedogs

While mining is the foundation of Whitedogs, the project has ambitious plans to integrate Stickers, NFTs, a digital marketplace, and further expand the ecosystem. Users will soon be able to buy, sell, and trade exclusive Stickers and NFT assets directly within Telegram, making blockchain adoption more accessible than ever.

“Our vision is to bridge the gap between casual users and blockchain technology by providing a fun, interactive, and rewarding experience within Telegram,” said Charles, the business developer at Whitedogs. “We believe Whitedogs will be a game-changer in the TON ecosystem.”

Why Whitedogs Stands Out

- **Seamless Telegram Integration:** No complicated setup—users can start mining and earning directly in Telegram.
- **Gamified Earning Model:** Engage in daily activities, invite friends, and participate in challenges to maximize rewards.
- **Upcoming NFT Marketplace:** A next-gen marketplace for artists, collectors, and crypto enthusiasts.
- **TON-Powered Security & Speed:** Built on The Open Network (TON) for fast, secure, and low-cost transactions.

Join the Whitedogs Movement

With over 40,000+ active users and growing, Whitedogs is set to become a major player in the TON ecosystem. Users can start their journey today by joining the official Telegram bot:
