

A Next-Generation HR and Payroll Software in the UAE

Dubai, United Arab Emirates May 12, 2025 ([Issuewire.com](https://www.issuewire.com)) - Rockford Technologies, a trusted leader in business technology solutions, proudly announces the launch of [Sage 300 People](#), an advanced HR and Payroll software in UAE. This powerful solution is designed to streamline human resource and payroll management for businesses of all sizes.

Sage 300 People HR System Software offers modern, flexible, and highly scalable features. It enables businesses to automate HR processes, ensure accurate payroll, and improve employee engagement.

Built with the needs of the UAE market in mind, this system provides compliance with local labor laws and supports multi-currency and multi-language operations.

"We are excited to bring Sage 300 People to businesses in the UAE," said a spokesperson from Rockford Technologies. "Our goal is to empower companies with the best HR technology, allowing them to focus more on their people and less on paperwork."

Rockford Technologies has a strong history of delivering trusted solutions like Sage 50 Accounting Software. With the addition of Sage 300 People HR System Software, the company further strengthens its portfolio, offering clients a complete business management ecosystem.

The new HR and payroll solution integrates seamlessly with existing business systems, providing a single, user-friendly platform to manage employee records, payroll processing, benefits administration, and more. It also features robust reporting tools to help businesses make better, faster decisions.

Businesses interested in upgrading their HR operations can learn more about Sage 300 People by visiting [Rockford Technologies' official website](#).
