

A Revolutionary Approach to Tooth Preservation: AVA Dental Brings Biomimetic Dentistry to Westfield, IN

Led by Dr. Jonathan Asimakopoulos, AVA Dental is redefining restorative dentistry through nature-inspired innovation.

Carmel, Indiana Apr 18, 2025 ([Issuewire.com](https://www.issuewire.com)) - AVA Dental, recognized as a Platinum Invisalign Provider in Westfield, is leading the charge in transforming how patients experience dental restoration with a groundbreaking approach called **Biomimetic Dentistry**. Under the skilled direction of [Dr. Jonathan Asimakopoulos, DDS](#), the clinic is offering a minimally invasive, tooth-conserving alternative that replicates the structure and strength of natural teeth.

Unlike traditional techniques that often involve excessive drilling and removal of healthy enamel, biomimetic dentistry focuses on **preserving the tooth's integrity** by mimicking its natural form and function. Through specialized bonding methods, advanced materials, and precision techniques, this approach strengthens the tooth from within — reducing the likelihood of future fractures or complications.

“Biomimetic dentistry allows us to treat patients with an emphasis on longevity and comfort,” says **Dr.**

Jon, who earned his DDS from the prestigious **University of Michigan School of Dentistry** and has received multiple awards in cosmetic and general dentistry. “It’s about preserving what’s already perfect—your natural tooth structure.”

Treatments Offered Include:

- **High-Strength Dental Bonding:** Creates a tight seal to reinforce damaged teeth.
- **Conservative Inlays & Onlays:** Restore function without removing healthy enamel.
- **Preventive Biomimetic Sealants:** Protect against decay while preserving natural anatomy.

With a reputation for quality, comfort, and patient-centered care, Dr. Jon has helped countless individuals regain confidence in their smile — especially through his extensive experience as a top-tier Invisalign provider. Whether addressing cosmetic concerns or restoring damaged teeth, his conservative and educational approach fosters trust and long-term success.

“Our goal is to change how people feel about going to the dentist,” adds Dr. Jon. “Modern tools, a compassionate team, and a philosophy that values natural preservation — that’s what sets AVA Dental apart.”
