

Exulting Digital Expands Global Footprint: Launches New Branch in the UK

London, United Kingdom Jan 12, 2026 (Issuewire.com) - Exulting Digital, a trusted digital marketing agency with a global vision, announces the launch of its UK branch as part of its international expansion strategy.

Exulting Digital, known for its innovative designs and data-driven insights, has proudly announced US to UK digital service expansion plans. The company claims that this move underlines its commitment to becoming a globally recognized marketing partner. With this expansion, the company plans to bring its proven expertise to businesses across the UK.

Delivering Digital Excellence Since Inception

Exulting Digital was founded to transform the way businesses engage with their clients and customers. From humble beginnings, it has moved on to become one of the result-oriented companies.

Managed from India and serving globally, the company has a presence in the US markets with outstanding results. With a comprehensive portfolio of services, including [SEO](#), **PPC**, **social media management**, **web design**, and branding, Exulting Digital empowers businesses to establish strong digital footprints.

"Our clients know we're not just here to run ads or manage accounts," said Senior Account Manager. "We're partners in their growth, and that's why they keep coming back."

Why the UK? A Strategic Choice for Global Growth

The growing demand from the European markets primarily fueled the decision to launch the Exulting Digital UK branch. With the UK being a global hub for business, the company feels that expanding a digital agency to the UK can be the right decision to achieve market disruption through smarter, more agile marketing strategies.

"Many UK businesses are looking for more personalized and performance-focused digital support," noted Head of Strategy. "We're here to meet that demand and exceed expectations."

Global Operations: Managed from India, Serving the World

While the UK and US branches focus on client-facing engagement, all backend operations—strategy, execution, and reporting—are managed from India. This model allows Exulting Digital to scale rapidly, offer competitive pricing, and tap into a diverse talent pool.

"Our India-based operations give us a strategic edge," said COO. "We can work around the clock, offer cost-effective solutions, and deliver top-tier quality to clients across the globe."

Credibility Built on Performance and Trust

Exulting Digital has a verified clutch profile that assures a reliable digital partnership. The company credibility is evident through glowing customer reviews and ratings.

"What sets Exulting Digital apart was their transparency and responsiveness," shared a recent UK client. "Their team felt like an extension of our own." This goes to prove the commitment of the company to long-term relationships, and client satisfaction.

Leadership Vision: Empowering Brands Across Borders

Founder Udit Sharma shares her broader vision:

"We're not just expanding services—we're expanding possibilities. We aim to help brands navigate the digital landscape irrespective of their geographical boundaries. With a passionate team and a client-first mindset, we're confident of making an impact in the UK and beyond."
