

Gomboc AI Unveils Revolutionary Cloud Security Platform to Redefine Enterprise Cyber Defense

Gomboc AI, a leader in intelligent cybersecurity solutions, proudly announces the official launch of its next-generation Cloud Security Platform, engineered to address the most pressing cloud security challenges faced by enterprises today.

California City, California Apr 7, 2025 ([Issuewire.com](https://www.issuewire.com)) - Since businesses migrate quickly on the cloud, the risk of misunderstanding, data violations and cyber attacks have increased rapidly. Gomboc AI's innovative platform is designed to bridge the speed and security, dynamic to strengthen organizations, to work safely in the cloud-first environment.

Gomboc AI CEO and co-founder Ian Amit said: "The future of cyber security lies in intelligent automation and real-time visibility." "Our new cloud safety platform is not only reactive-it is a future, active and specially produced for the complications of modern cloudy frastructure."

Cloud Security A Game-Chariser

The [Cloud Security platform](#) of the Gomboc AI combines the power of artificial intelligence, machine learning and behavioral analysis, providing a 360-degree security solution that works in data, users and many skiing environments.

Important features and abilities:

AI-II-MANGO Constant Faring Detection: The blame environment monitors 24/7 to find out the dangers of deviations, harmful software, unauthorized access and internal formula before they continue.

Auto-premediation Engine: Using intelligent automation immediately reduces misunderstandings, privilege growth and compliance violations.

Integrated Safety Currency Management (CSPM + CNAPP): AWS, Azure, Google Cloud and Hybrid Infrastructure Centralize Policy Enforcement, Vulnerability Evaluation and Owe Visibility.

Compliance-Taiyar Framework: SOC 2, GDPR, PCI-DSS and HIPAA support 25 compliance standards, reduce the revision time and ensure continuous reading.

DevSecop's integration: Cloud-Country applications during growth and distribution are basically integrated with CI/CD pipelines.

Scale designed for security

Gomboc AIS platform is designed with a skyland, scalable architecture suitable for the requirements of global companies, which offers zero delay and industry-agar uptime. Whether managing hundreds or thousands of cloud values, organizations can maintain real -time visibility, control and safety on the main.

Initial adoption in areas including finance, health care, retail and mother -in -law has praised the placement of platforms, the correlation of intelligent danger and easy timely automation, and reports a 75% reduction in manual safety work and 4x fast -events reaction.

Put a new standard in cloud safety

With Gomboc AI, companies no longer need to choose between agility and safety. The platform defines

innovation without any compromise by making cloud protection smart, faster and more flexible.

"Gombok Ai's platform is like having a 24/7 cloud security team that never sleeps," said Matt Sweeney from a leading Fintech company. "It is intelligent, simple and deeply transformative."

About Gombok AI

Gomboc AI is an innovative innovator who benefits from artificial intelligence to protect the shooter infrastructure. Headquarters in San Francisco, Gombok AI, is on an assignment to simplify and secure skysur for businesses worldwide. By combining the State -Art -art research with practical, real -world solutions, Gombok AI AI organizations helps be ahead of developing cyber threats.
