

New Partnership Between Scopism & Integris Applied to Help Organizations Maximize Multi-Supplier Environments ROI

New Partnership between Scopism, the leading SIAM and service management best practice content provider, and Integris Applied, a US-based IT services and sourcing advisory firm known for fostering SIAM adoption in the Americas.

The Woodlands, Texas Apr 23, 2025 ([IssueWire.com](https://www.issuewire.com)) - Scopism, the leading SIAM and service management best practice content provider, and Integris Applied, a US-based IT services and sourcing advisory firm known for fostering SIAM adoption in the Americas, is pleased to announce that Integris Applied will be the exclusive distributor and assessor of Scopism SIAM Assured (SSA) in the Americas region.

Scopism SIAM Assured (SSA) is a worldwide standard confirming an organization's ability to provide effective SIAM services with measurable results. Firms that achieve SSA certification include consultancy/advisory organizations, managed service providers, and tooling providers. SSA allows them to provide evidence of their SIAM expertise to current or potential customers. In order to achieve certification, a rigorous assessment must confirm the organization's services and performance, including governance and risk management, continual improvement, innovation and much more. Recognizing that there is no one 'true' way to adopt SIAM, Scopism has built an accreditation that focuses on the outcomes that an organization has delivered for its clients. Integris Applied's role will be to identify and/or perform assessments for providers in the Americas region, including companies across North and South America.

Diane Druitt, owner of Integris Applied, said, *"After getting to know Claire Agutter and Scopism and recognizing our shared focus and alignment, we at Integris Applied are very excited about this*

opportunity to team with the leader in SIAM to bring Scopism SIAM Assured to firms in the Americas region."

Claire Agutter, Director of Scopism, said: "We know from the Scopism SIAM Global Survey that there has been a 25% increase in interest in SIAM from USA organizations since 2022. With the HCLTech becoming the first organization to recently become SIAM Assured and a second to be announced shortly, companies are witnessing the benefits that becoming assured provides. Scopism welcomes the opportunity to partner with Integrus Applied moving forward. Together, we can support organizations to drive up standards and realize the streamlining and cost savings using the SIAM method delivers."

Key to this partnership was Integrus Applied Senior Advisor Matt Reprogle, who has been a long-time expert and practitioner in SIAM. Reprogle said: *"As a SIAM senior advisor at Integrus Applied, I'm excited to contribute my service provider and consulting experience to the Scopism SIAM Assured partnership. We look forward to identifying and recognizing the leading SIAM providers across the Americas. "*
