

NightGTA Releases “Peligrosa (Slowed),” a Hypnotic Trap Rework Featuring killumusic and Polyphagus

The German producer and digital artist blurs the line between ambient trap and urban emotion with his latest slowed-down collaboration.

Los Angeles, California Apr 17, 2025 ([IssueWire.com](https://www.issuewire.com)) - German producer and independent artist NightGTA has just dropped Peligrosa (Slowed), a chilled, reimagined version of the original Latin trap hit. With a deep, cinematic feel and moody textures, the track showcases the artist's signature style — a fusion of slowed trap, ambient layers, and late-night atmosphere.

Featuring collaborators killumusic and Polyphagus, the remix draws from both Latin roots and futuristic sonic design. Original production comes from FloyyMenor, and the result is a track that feels raw, spacious, and hypnotically immersive.

“The idea behind this version was to slow things down — not just in tempo, but in energy. I want people to sit with the sound, to feel it breathe,” says NightGTA.

About NightGTA

NightGTA is a self-produced artist from Fulda, Germany, known for crafting slow-burning edits and emotional trap music with a digital edge. Inspired by online subcultures, underground phonk, and the aesthetics of hypermodern internet life, his work blurs the boundaries between music and mood. He began gaining traction through TikTok and Spotify in 2024, where his slowed edits and remixes started resonating with global audiences looking for music that’s equal parts intense and introspective.

With influences ranging from Kordhell and Night Lovell to ambient trap pioneers, NightGTA creates music that isn’t just for streaming — it’s for zoning out, reflecting, and locking into a vibe. He’s also known for designing his own visuals, mixing art direction with sound to create a full experience for his listeners.
