

SPARQ AI Announces Device-Free Platform Access for All Drivers

Irvine, California Apr 12, 2025 ([IssueWire.com](https://www.issuewire.com)) - SPARQ Platform Expands to Device-Free Access

SPARQ is making its platform more accessible than ever. **Starting April 9, 2025, consumers will be able to access the SPARQ platform without needing a physical device.** This milestone marks a significant expansion in SPARQ's mission to provide seamless, next-generation automotive connectivity to everyone, regardless of hardware.

"We are committed to making SPARQ as easy and accessible as possible for users," said Codrin Cobzaru, Co-Founder & CTO. "By removing the need for a dedicated device, we're allowing even more people to experience the power of SPARQ, whether they're at home or on the go."

This advancement means that users can now engage with the SPARQ AI platform using only their smartphones or tablets, broadening the reach of SPARQ's dynamic automotive ecosystem and making it more convenient than ever for individuals and businesses to analyze, monitor, and take action related to their vehicle data.

About SPARQ

SPARQ is revolutionizing vehicle diagnostics with its AI-powered software and SPARQ Diagnostics device, creating a seamless connection between drivers and their vehicles. Combining AI analysis with real-time vehicle data enables SPARQ's software to deliver predictive maintenance alerts, instant diagnostics, and always-on performance monitoring through an easy-to-use platform. This technology empowers drivers with actionable information that reduces unexpected breakdowns and optimizes vehicle health through intelligent, data-driven solutions.
