

TAL Global and TipNow Join Forces in Strategic Partnership

Fremont, California Apr 25, 2025 ([Issuewire.com](https://www.issuewire.com)) - TipNow, a leader in AI-powered security and safety solutions, and TAL Global, a leading security and risk consulting firm, are proud to announce a strategic partnership. With both companies based in Silicon Valley, this collaboration is set to redefine the standards of security and risk management with the introduction of innovative artificial intelligence technology.

The mission for TipNow is to make organizations Safer with a focus on prevention, using human threat intelligence, AI, and computer vision-based threat intelligence. TipNow-Pro is a comprehensive mobile application platform which includes an integrated product with various modules for making organizations safer.

TAL Global is a security consulting and risk management firm specializing in mitigation and prevention of all risks and has operated in Silicon Valley since 1998. TAL Global serves multinational corporations, businesses of all sizes, governments, and non-profit organizations by supporting them in security management, risk assessment, intervention in workplace violence cases, executive protection, and training to proactively reduce our clients' risks.

This partnership will provide clients with access to new services and technology and provide added value through the combined expertise and reach of both organizations.

Johnathan Tal, Founder and CEO of TAL Global stated, "TipNow and TAL Global are committed to pushing the boundaries of what is possible in security and risk management, setting a new industry benchmark for excellence and innovation for the benefit of our clients."

Cyril Rayan, President and CEO of TipNow said, "This partnership aims to deliver advanced, proactive solutions that significantly enhance safety and efficiency across various sectors such as education, corporate, government services and healthcare.

Following this announcement TAL Global and TipNow will offer innovative best-in-class services combining technology, security, and risk solutions.
