

## Tianhong New Material Corporation is located

**Afono, Eastern Apr 28, 2025 ([IssueWire.com](http://IssueWire.com))** - Tianhong New Material Corporation is located in Jieshou New & High-Tech Industrial Development District of Anhui province, covering an area of more than 100 acres, with 6000 square meters of office area and 50000 square meters of a dust-free purification workshop.

Tianhong is a professional integrated enterprise, which is engaged in production, marketing, R&D, and services for Li-ion battery separator film. With a solid technical foundation and a commitment to superior quality, Tianhong Corporation has earned a strong reputation across various sectors. Our products are not only distributed nationwide but also exported to regions such as Europe, Central and Southeast Asia, and South America, earning widespread recognition.

Tianhong corporation has advanced international production lines for Li-ion battery separator by dry and uniaxial tension process, equipped with high precision testing instruments, using the international advanced production technology, mainly producing Li-ion battery separator in thickness of 12-40 microns with different specifications, which is widely used in Li-ion power batteries, Li-ion energy storage battery, and Li-ion digital product battery.

Advantages:

1: Good Uniformity: Using a popular dry & uniaxial stretching process, ensure the pore sizes are uniform and well distributed on the membrane. The separator has a multilayer structure with better thickness uniformity to improve Li-ion battery cycle life.

2.High safety: Multilayer membrane efficiently reduces the safety hazards (crystal point, holes...) which are found as defects on single-layer membrane; low TD & MD shrinkage; Perfect heat resistance and anti-oxidant; High puncture strength & mechanical strength, suitable for high/low voltage systems.

3 . Various products: Basic separator, Ceramic coated separator, Polymer coated separator, Multifunctional hybrid coating separator, Multi-layer functional coated separator..

4 . Excellent air permeability: high porosity, high air-permeability, low sinuosity, and uniform pore distribution, suitable for high-rate discharging of electric vehicle Li-ion battery.

Because of the excellent quality, strict management, strong technological base, novel design, and meticulous service, Tianhong Corporation has won a good reputation in the social communities.

Based on "Intercourse with sincerity, Collaborative winning cooperation" business principles, our corporation will continue innovation and development, and maintain eternal vitality, to create splendors with all sectors of society!

JIESHOU TIANHONG NEW MATERIAL CO., LTD.

Founded in 2008, a professional manufacturer of lithium-ion battery separator film
