ergoV™

3.8x, 5.3x, 7.0x

ergoV™ Pro

5.6x, 7.4x, 10.0x

Edmonton, Alberta May 5, 2025 ([IssueWire.com](https://www.issuewire.com)) - **Andau Medical**, a leading provider of innovative medical and dental technologies, is proud to announce the North American launch of the [Ergo V and Ergo V Pro loupes](#), the world's first multi-mag ergo loupes. Manufactured by Admetec and distributed in North America by Andau Medical, these groundbreaking products are designed to enhance clinical precision and ergonomics for dental professionals.

The [Ergo V and Ergo V Pro loupes](#) offer three magnifications in one, allowing clinicians to seamlessly adjust magnification levels during procedures. This flexibility ensures optimal visualization and accuracy, catering to the diverse needs of dental practitioners. **Why choose when you can have it all?** Now clinicians don't have to choose a magnification; they can have three in one.

Historically, multi-mag loupe has been heavy, bulky, and costly. **"We have solved these issues** with a single loupe that is roughly the same weight as our current lightweight ergo loupes, with three easily adjustable magnifications, all for the same cost as a single magnification loupe," said Ido Drory, CEO of Admetec.

"We are thrilled to introduce the [Ergo V and Ergo V Pro loupes](#) to the North American market," said Sandi Wright, CEO of Andau Medical. "We were among the first to launch ergonomic loupes in the North American market, and they have proven to be a complete game changer. Ergo V is the next major advancement in the loupes market and will quickly become **the new standard of practice for all dentists.**"

[About Andau Medical](#)
