

Clayton Dental Group's Dr. Mehran Haidari Delivers Same-Day Dental Implants with Teeth-In-An-Hour™

Get fully functioning, natural-looking teeth in just one visit with this cutting-edge, minimally invasive implant technology.

Concord, California May 8, 2025 ([Issuewire.com](https://www.issuewire.com)) - Clayton Dental Group is proud to introduce **Teeth-In-An-Hour™**, an advanced dental implant solution that allows patients to walk out with fully functioning, natural-looking teeth in just one hour. Led by [Dr. Mehran Haidari, DMD](#), the Concord-based practice is transforming smiles—and lives—using the latest in computer-guided implant technology.

Teeth-In-An-Hour™ is a groundbreaking approach to dental restoration that merges cutting-edge imaging and surgical techniques to minimize discomfort and downtime. Unlike traditional dental implants that require multiple procedures and extended healing time, this innovative solution provides immediate results, with most patients resuming normal activities the very next day.

“We are excited to offer our patients a faster, more comfortable solution for restoring their smiles,” says **Dr. Haidari**. “With Teeth-In-An-Hour™, we can give people back their confidence—and their ability to enjoy life—without the long wait.”

The process begins with a detailed **CAT scan** of the patient’s jawbone. This scan creates a **3D model** that, when combined with virtual planning software, allows for precise placement of the implants—without the need for invasive flap surgery. The result? **Less swelling, bruising, and post-operative pain**, and significantly reduced time in the dentist’s chair.

Clayton Dental Group has long been recognized for its comprehensive approach to **implant dentistry**, offering personalized consultations, expert restorative care, and flexible financing through CareCredit. Patients from **Concord, CA, and surrounding areas** trust Dr. Haidari and his skilled team for top-tier results and compassionate care.

Whether you're missing a single tooth or seeking full-mouth restoration, **Teeth-In-An-Hour™** could be the life-changing solution you've been waiting for.
