

Daniel Olson, MD: Pioneering Personalized Care in Oncology in Chicago's Hyde Park

Expert Oncologist Brings Innovative Treatments and Compassionate Care to Patients Facing Skin Cancers and Sarcomas

New York City, New York May 9, 2025 ([Issuewire.com](https://www.issuewire.com)) - The Chicago medical community is proud to welcome Dr. Daniel Olson as an Assistant Professor of Medicine specializing in Medical Oncology at the University of Chicago - Hyde Park. With a dedicated focus on diagnosing and treating skin cancers and sarcomas as well as offering multiple early-phase immunotherapy clinical trials, Dr. Olson is committed to delivering the highest quality of personalized cancer care to his patients in the Chicagoland area.

He completed his medical education at Rush University Medical College and further honed his skills during his residency at Northwestern University Feinberg School of Medicine, followed by a fellowship at the University of Chicago Medicine. He is board-certified in Medical Oncology and Internal Medicine.

Dr. Olson possesses extensive expertise in managing various skin cancers, particularly melanomas, as well as rare skin cancers and soft tissue and bone sarcomas. Utilizing the latest advancements in oncology, he offers state-of-the-art treatment options, including immunotherapy, targeted therapies, and traditional chemotherapy. Notably, he is among a select group of oncologists providing innovative cell-based immunotherapies such as tumor-infiltrating lymphocyte (TIL) therapy, designed to harness the patient's immune system to fight cancer.

Understanding that every patient has unique needs, Dr. Olson emphasizes a personalized approach to treatment. He takes the time to listen to his patients, addressing their concerns and tailoring treatment plans accordingly. His ultimate goal is to not only target the cancer effectively but also enhance the overall quality of life for his patients.

Dr. Olson's dedication extends beyond patient care; he is also an active researcher in the field of immunotherapy. He leads multiple clinical trials within the Developmental Therapeutics Program, focusing on innovative treatments for solid tumors that have not responded to standard therapies. His work in managing solid tumor cell therapy trials is paving the way for new and effective treatment options for patients.

As a prior United States Peace Corps Volunteer in Guatemala, Dr. Olson has a deep commitment to community service and is fluent in Spanish, allowing him to provide exceptional care to Spanish-speaking patients.
