

Expert Neurology Billing Solutions from MBC

MBC Launches Specialized Neurology Billing Services to Maximize Revenue and Ensure Compliance
Subtitle: Neurology Medical Billing Services by Medical Billers and Coders (MBC)

Wilmington, Delaware Jun 11, 2025 ([IssueWire.com](https://www.issuewire.com)) - Medical Billers and Coders (MBC), a leader in healthcare revenue cycle management, has introduced a **dedicated Neurology Billing Service** designed to meet the complex coding and reimbursement requirements of neurology practices.

Neurology billing involves intricate procedures such as EEGs, EMGs, sleep studies, and nerve conduction tests. These services require accurate CPT/ICD-10 coding and detailed documentation to avoid denials and delays.

“Our neurology billing model is built to support the unique challenges of neurological care,” said Ms. Prerna Gupta, Director at MBC. “With expert coders and payer-specific knowledge, we help neurologists improve collections and reduce administrative burden.”

Key Features:

- Coding accuracy for complex neurology procedures
- Support for tele-neurology and in-office services
- Pre-bill audits to reduce denials
- EHR integration for smooth workflow
- Regular updates on payer and CMS guidelines

Neurologists across the U.S. can now **outsource their billing to MBC** and focus more on patient care, while we ensure faster payments, fewer denials, and higher revenue.
