

Flying Bowling Unveils Expert Resource for Building Cost-Effective Duckpin Bowling Alleys

Guangzhou, Guangdong Jun 2, 2025 ([Issuewire.com](https://www.issuewire.com)) - As the popularity of alternative bowling formats continues to rise, **Flying Bowling**, a global provider of bowling solutions, has released a comprehensive guide for entrepreneurs and venue developers titled: [‘Building a 12 Lane Bowling Alley: Cost & Considerations’](#). This resource offers clear, actionable insights into the cost structure, equipment requirements, and operational strategies behind launching a successful **duckpin bowling center**.

Duckpin bowling, a smaller and more skill-focused variation of traditional ten-pin, has emerged as a favorite in both family entertainment venues and urban recreational spaces. Its compact footprint and lower setup costs make it an ideal investment for hospitality groups, event spaces, and sports entrepreneurs seeking to diversify their offerings.

"We're seeing a sharp rise in inquiries from business owners looking to add Duckpin lanes to their venues," says Jackson, Director of Global Strategy at Flying Bowling. "Our mission is to simplify the process — from lane design to pinsetter technology — so operators can launch with confidence."

Key topics covered in the guide include:

- Cost breakdown for 12-lane duckpin installations
- Equipment sourcing and lane configuration tips
- Common pitfalls in bowling alley construction
- Revenue models and ROI considerations for 2025

In addition to construction planning, Flying Bowling has also published a related consumer-facing blog post titled [Duckpin Bowling Tricks and Tips](#), aimed at educating new players and boosting customer engagement across bowling centers.

About Flying Bowling

Flying Bowling is a trusted name in bowling alley manufacturing, equipment supply, and venue development consulting. With decades of industry experience and a global footprint, Flying Bowling supports both new builds and renovations for ten-pin, duckpin, and boutique bowling installations worldwide.
