

## **Freeze Boxes Launches New Affordable Small Refrigerated Trailers – Compact, Efficient, and Ready to Roll**

In a bold move to make cold storage transport more accessible and efficient,

**North Las Vegas, Nevada May 15, 2025 ([IssueWire.com](https://www.issuewire.com))** - Freeze Boxes, a leader in eco-conscious refrigeration solutions, has officially launched its latest innovation: a line of low-cost small refrigerated trailers, available in 8-foot and 10-foot models.

Available now at <https://freezeboxes.com/product/low-cost-small-refrigerated-trailer-8ft-10ft/>. These trailers are designed to offer an affordable, practical solution for transporting perishable goods, whether you're a local farmer, food truck owner, pharmaceutical distributor, or a catering company. With their compact size and powerful refrigeration capabilities, they're set to be a game-changer in the cold transport market.

## A Fresh Take on Cold Storage

For years, small and medium-sized businesses have struggled to find refrigerated transport options that balance performance with affordability. Traditional cold storage trailers are often bulky, expensive, and over-engineered for the needs of smaller operations. Freeze Boxes set out to change that.

"Our goal was simple: build a trailer that's reliable, easy to use, and doesn't break the bank," says the founder of Freeze Boxes. "We saw so many small business owners improvising with coolers or makeshift solutions. That's not sustainable, and that's where these new trailers come in."

## Product Highlights:

- **Sizes That Fit Your Business:** Available in 8-foot (\$10,800) and 10-foot (\$11,800) models, these trailers are ideal for tight spaces, urban deliveries, and event setups.
- **Temperature Control:** Each unit maintains a temperature range from 25°F to 50°F, making it suitable for frozen goods, chilled beverages, dairy, produce, and more. For 0°F freezing options, please call for pricing: (725) 258-2889.
- **Energy Efficient:** Powered by advanced cooling systems that prioritize energy savings without compromising performance.
- **Built to Last:** Featuring heavy-duty insulated walls, durable flooring, and secure locking systems, these trailers are road-ready and weather-resistant.
- **Plug-and-Play Operation:** Easily connect to a standard 110V outlet or generator for seamless use at markets, festivals, or remote sites.

## Who It's For:

These trailers have already sparked interest across a wide range of industries:

- **Catering & Events:** Maintain food safety and freshness on-site, from weddings to food festivals.
- **Agriculture & Farming:** Perfect for farmers who need to transport or store milk, meat, or vegetables before they hit the market.
- **Pharmaceuticals & Labs:** Keep medicines, vaccines, or lab samples at the required temperature during transit.
- **Emergency Response Teams:** Quickly deploy cold storage to disaster zones, medical camps, or relief sites.

## Real Impact, Real Stories

Early customers have already started to see the benefits. One California-based catering business

shared their experience:

*"Before this, we had to turn down out-of-town gigs because we couldn't guarantee our food would stay fresh. Now with our 10-foot Freeze Boxes Small Refrigerated Trailer, we're expanding our reach and even taking on weddings outside the city. It's opened up a whole new world for us."*

### **Innovation Rooted in Purpose**

Freeze Boxes has built its reputation on sustainable and scalable cold storage solutions. From mobile cold rooms to portable freezers, the company is known for its customer-first mindset and focus on quality. This latest trailer line embodies that spirit - innovation made accessible.

"Whether you're just starting your business or looking to streamline logistics, this trailer gives you the power of cold storage without the steep price tag."
